

AOM™ — Audio Origin Module

OOF™ Origin Open Foundation™

Independent Methodological Authority

Category: AI and Interpretation

Subcategory: Content Origin Declaration

Module: Audio Origin Module (AOM™)

Type: Declaration Module

Standard: Origin Declaration Standard (ODS™)

Status: Canonical Module

Version: 1.0

Effective Date: 17 March 2026

Canonical Definition

The Audio Origin Module (AOM™) defines how the origin of audio content is declared using a single, clear origin code.

The module enables immediate recognition of whether audio is human generated, AI generated, or undeclared.

Declaration

Only one origin code may be used:

- **HGA** — Human Generated Audio
 - **AGA** — AI Generated Audio
 - **UGA** — Unknown Generated Audio
-

Usage

Audio Level (required — single code)

One origin code must be associated with the audio content.

Examples:

- HGA
- AGA
- UGA

Description Level (required)

The declaration must be included in the description or metadata:

Audio: HGA

OOF Compatible — ODS™ Standard

<https://originopenfoundation.org>

OOF Compatibility

Content using this module may include the statement:

OOF Compatible — ODS™ Standard

A reference link to the official source is required.

Use Case 1 — Podcast Transparency

Scenario

A podcast includes human speech, AI voice, or mixed production.

Application

The creator declares audio origin (HGA / AGA / UGA).

Result

- Clear listener understanding
 - Increased trust
 - Transparent content production
-

Use Case 2 — Voice AI Content

Scenario

AI-generated voice content is used in media, narration, or automation.

Application

Audio origin is declared as AGA.

Result

- Clear distinction from human voice
 - Reduced confusion and misuse
 - Aligned platform and audience expectations
-

Structural Principle

One code defines origin.

Declared origin defines trust.

Closing Statement

What is heard should not be assumed.

It should be declared.
