

Audit Record Preservation Module

OOF™ Origin Open Foundation™

Independent Methodological Authority

Architecture Ecosystem: Structured Reality Standards™

Architecture Family: ADIT® — Continuous Audit & Evidence Governance Architecture

Parent Standard: Audit Preservation Standard

Operational Layer: Audit Preservation Governance Layer

Category: Governance & Enforcement

Subcategory: Audit & Evidence Governance

Type: Parent Standard Module

Governed Space: Audit Record Preservation

Version: 1.0

Status: Canonical · Open Module

Origin Date: 31 July 2026

Compatibility: OOF Methodology OS · GOA™ · OBIDENTITY® · INTEGROS® · ORA™ · AGA™ · AIG® · CLIA® · MGIA™ · ASGA™ · RIS™

AI-Readable: Yes

Authority: OOF®

Protection: MIP™ — Methodological Intellectual Property

Canonical Language: English (UCL)

Governed Space

Audit Record Preservation

Canonical Definition

Audit Record Preservation Module defines the governance framework for preserving complete audit records throughout their required lifecycle. It establishes preservation methodology, record retention requirements, governance controls, lifecycle management, and continuous preservation assurance necessary to ensure that audit records remain complete, accessible, trustworthy, traceable, and independently reconstructable over time.

Operational Role

Audit Record Preservation Module governs the preservation layer of audit records by ensuring that every audit document, evidence reference, finding, response, approval, and governance decision remains securely preserved throughout the required retention period.

Minimum Implementation Framework

1. Define Preservation Requirements

Establish record categories, retention periods, preservation objectives, governance requirements, responsible authorities, and accessibility conditions.

2. Define Preservation Methodology

Develop standardized procedures for preserving audit records, maintaining record integrity, organizing retained information, and ensuring long-term accessibility.

3. Define Preservation Validation Logic

Verify that preserved audit records remain complete, authentic, accessible, traceable, governance-compliant, and suitable for independent reconstruction.

4. Define Governance Response

Establish procedures for missing records, preservation failures, unauthorized alterations, accessibility issues, governance exceptions, and corrective preservation actions.

5. Preserve Preservation Records

Maintain preservation history, retention decisions, governance approvals, validation reports, timestamps, access history, and lifecycle documentation throughout the complete audit lifecycle.

Example Use Cases

Use Case 1 — Autonomous AI Governance

Scenario

An organization preserves governance records following the audit of an autonomous AI platform.

Application

Audit Record Preservation Module governs the secure retention and lifecycle management of audit evidence, findings, corrective actions, approvals, and related governance records.

Result

Complete audit records remain accessible, trustworthy, and independently reconstructable throughout the required retention period.

Use Case 2 — Regulatory Compliance Audit

Scenario

A regulatory authority requires an organization to retain audit documentation for future inspections and legal review.

Application

Audit Record Preservation Module governs record preservation, retention controls, accessibility, and validation according to established governance requirements.

Result

Historical audit records remain complete, protected, traceable, and available for future governance and regulatory review.

Canonical Closing Statement

Audit Record Preservation Module establishes the canonical governance framework for preserving audit records throughout their complete lifecycle. By governing preservation methodology, retention controls, governance validation, lifecycle management, and continuous preservation assurance, the module enables long-term audit trust, operational reconstruction, accountable governance, and independent verification across all operational domains.
