

Audit Preservation Standard

OOF™ Origin Open Foundation™

Independent Methodological Authority

OriginID: OOF-OID-ADIT-APS-2026-07-31-0009

Architecture Ecosystem: Structured Reality Standards™

Architecture Family: ADIT® — Continuous Audit & Evidence Governance Architecture

Operational Layer: Audit Preservation Governance Layer

Category: Governance & Enforcement

Subcategory: Audit & Evidence Governance

Type: Parent Standard

Governed Space: Audit Preservation

Version: 1.0

Status: Canonical · Open Standard

Origin Date: 31 July 2026

Compatibility: OOF Methodology OS · GOA™ · OBIDENTITY® · INTEGROS® · ORA™ · AGA™ · AIG® · CLIA® · MGIA™ · ASGA™ · RIS™

AI-Readable: Yes

Authority: OOF®

Protection: MIP™ — Methodological Intellectual Property

Canonical Language: English (UCL)

Governed Space

Audit Preservation

Core Question

How can audit evidence, execution history, findings, responses, and governance records remain preserved, accessible, trustworthy, and reconstructable throughout their complete lifecycle?

Canonical Definition

Audit Preservation Standard defines the governance conditions required to preserve audit evidence, execution records, findings, responses, decisions, approvals, and supporting governance information throughout the complete audit lifecycle. It establishes preservation methodology, lifecycle controls, retention requirements, governance mechanisms, preservation validation, and continuous preservation assurance necessary to ensure that audit history remains complete, accessible, trustworthy, traceable, and independently reconstructable over time.

Governance Flow Position

Audit Observation → Evidence Formation → Evidence Integrity → Evidence
Correlation → Evidence Verification → Audit Execution → Audit Findings → Audit
Response → Audit Preservation → Audit Assurance

Standard Abstract

An audit cannot remain trustworthy if its history cannot be preserved.

Evidence, decisions, findings, responses, approvals, and execution records must remain available long after operational activities have ended.

Audit Preservation Standard establishes the canonical methodology for preserving the complete audit history so that operational reality remains reconstructable and independently verifiable throughout its required lifecycle.

Operational Role

Audit Preservation Standard governs the preservation layer of audit governance by establishing standardized methods for retaining, protecting, organizing, validating, retrieving, and preserving complete audit records and supporting evidence.

Operational Space

Audit Preservation Standard governs:

- audit preservation
 - audit record retention
 - audit archives
 - audit continuity
 - audit history
 - audit retrieval
 - preservation assurance.
-

Why This Standard Exists

Audit value extends beyond the moment an audit is completed.

Organizations require a governed methodology to preserve audit records for future governance decisions, regulatory review, investigations, historical reconstruction, organizational learning, and independent assurance.

Audit Preservation Standard exists because Audit Preservation represents the ninth governed space of ADIT® — Continuous Audit & Evidence Governance Architecture™, ensuring that complete audit history remains preserved and trustworthy throughout its lifecycle.

Scope

This standard may be applied across:

- AI systems
- autonomous systems
- cybersecurity
- digital forensics
- financial auditing
- healthcare
- industrial operations
- regulatory compliance
- critical infrastructure
- digital identities
- operational governance
- and any governed environment requiring long-term audit preservation.

Relationship to Other OOF® Architectures

Audit Preservation Standard interoperates with:

- GOA™
- OBIDENTITY®
- INTEGROS®
- ORA™
- AGA™
- AIG®
- CLIA®
- MGIA™
- ASGA™
- RIS™

by providing the canonical methodology for preserving complete audit history, evidence, and governance records throughout their required lifecycle.

Foundational Principle

An audit remains trustworthy only while its complete history remains preserved, accessible, and independently reconstructable.

Canonical Closing Statement

Audit Preservation Standard establishes the canonical governance framework for preserving audit history throughout its complete lifecycle. By governing record retention, preservation methodology, lifecycle controls, governance validation, and continuous preservation assurance, the standard enables long-term audit trust, operational reconstruction, accountable governance, and independent verification across all operational domains.
