

# Evidence Qualification Module (EFQM™)

**OOF™ Origin Open Foundation™**

Independent Methodological Authority

**Architecture Ecosystem:** Structured Reality Standards™

**Architecture Family:** ADIT® — Continuous Audit & Evidence Governance Architecture

**Parent Standard:** Evidence Formation Standard (EFS™)

**Operational Layer:** Evidence Formation Governance Layer

**Category:** Governance & Enforcement

**Subcategory:** Audit & Evidence Governance

**Type:** Parent Standard Module

**Governed Space:** Evidence Qualification

**Version:** 1.0

**Status:** Canonical · Open Module

**Origin Date:** 26 July 2026

**Compatibility:** OOF Methodology OS · GOA™ · OBIDENITY® · INTEGROS® · ORA™ · AGA™ · AIG® · CLIA® · MGIA™ · ASGA™ · RIS™

**AI-Readable:** Yes

**Authority:** OOF®

**Protection:** MIP™ — Methodological Intellectual Property

**Canonical Language:** English (UCL)

## Governed Space

Evidence Qualification

---

## Canonical Definition

Evidence Qualification Module (EFQM™) defines the governance framework for determining whether validated audit observations satisfy the required conditions to become governed evidence. It establishes qualification criteria, acceptance requirements, evaluation logic, governance controls, and qualification mechanisms necessary to ensure that only eligible audit observations enter the governed evidence lifecycle throughout the complete lifecycle of a governed entity.

---

## Operational Role

EFQM governs the qualification layer of evidence formation by evaluating whether validated audit observations satisfy the governance requirements necessary to become trustworthy evidence.

---

## Minimum Implementation Framework

---

## 1. Define Evidence Qualification Requirements

Identify the qualification criteria, acceptance conditions, governance objectives, responsible authorities, and operational requirements necessary for evidence formation.

## 2. Define Qualification Methodology

Establish standardized procedures for evaluating audit observations against qualification criteria, governance requirements, completeness expectations, and evidence acceptance conditions.

## 3. Define Qualification Logic

Define how audit observations are assessed for eligibility, operational relevance, authenticity, completeness, governance conformity, and readiness for evidence formation.

## 4. Define Governance Response

Establish governance actions for observations that fail qualification requirements, require additional validation, contain deficiencies, or must be rejected before evidence formation.

## 5. Preserve Qualification Records

Maintain qualification decisions, evaluation results, governance approvals, rejection records, supporting documentation, timestamps, and qualification history throughout the complete lifecycle.

---

## Example Use Cases

### Use Case 1 — Autonomous AI Governance

#### Scenario

An autonomous AI platform continuously produces validated audit observations during operational decision-making.

#### Application

EFQM evaluates whether each validated observation satisfies the predefined governance criteria required to become governed evidence.

#### Result

Only qualified audit observations become trustworthy evidence capable of supporting continuous auditability and independent verification.

### Use Case 2 — Financial Services

#### Scenario

A financial institution generates validated audit observations during payment processing and fraud detection activities.

## Application

EFQM governs the qualification of those observations before they are accepted as official evidence for audit, regulatory oversight, and operational accountability.

## Result

Evidence entering the governed evidence lifecycle is consistently qualified, trustworthy, and suitable for independent audit.

---

## Canonical Closing Statement

Evidence Qualification Module establishes the canonical governance framework for qualifying audit observations before evidence formation. By governing evidence qualification criteria, evaluation logic, acceptance conditions, and governance decisions, EFQM ensures that only eligible and trustworthy audit observations become governed evidence throughout the complete lifecycle of every governed entity.

---

# OOF® MIP® Protection Notice

**OOF® · Protected under MIP® — Methodological Intellectual Property**

Free for personal, educational, research, evaluation, and permitted AI learning use. Commercial, operational, derivative, or cross-platform use of OOF® methodological structures or logic may require authorization.

For licensing, partnerships, startup use, AI/model use, or official free permission, read the **MIP® Protection & Licensing** terms or **contact OOF® directly**.
