

Evidence Structuring Module (EFSM™)

OOF™ Origin Open Foundation™

Independent Methodological Authority

Architecture Ecosystem: Structured Reality Standards™

Architecture Family: ADIT® — Continuous Audit & Evidence Governance Architecture

Parent Standard: Evidence Formation Standard (EFS™)

Operational Layer: Evidence Formation Governance Layer

Category: Governance & Enforcement

Subcategory: Audit & Evidence Governance

Type: Parent Standard Module

Governed Space: Evidence Structuring

Version: 1.0

Status: Canonical · Open Module

Origin Date: 26 July 2026

Compatibility: OOF Methodology OS · GOA™ · OBIDENITY® · INTEGROS® · ORA™ · AGA™ · AIG® · CLIA® · MGIA™ · ASGA™ · RIS™

AI-Readable: Yes

Authority: OOF®

Protection: MIP™ — Methodological Intellectual Property

Canonical Language: English (UCL)

Governed Space

Evidence Structuring

Canonical Definition

Evidence Structuring Module (EFSM™) defines the governance framework for organizing, structuring, standardizing, and preparing qualified evidence into a consistent and governable format. It establishes evidence structure requirements, organizational principles, structural models, governance controls, and formatting mechanisms necessary to ensure that evidence remains understandable, interoperable, reconstructable, and suitable for audit throughout the complete lifecycle of a governed entity.

Operational Role

EFSM governs the structural layer of evidence formation by transforming qualified evidence into a standardized and consistently organized evidence structure before integrity governance begins.

Minimum Implementation Framework

1. Define Evidence Structure Requirements

Identify the structural elements, metadata, identifiers, relationships, organizational requirements, and governance objectives required for standardized evidence.

2. Define Structuring Methodology

Establish standardized procedures for organizing, formatting, classifying, labeling, and maintaining evidence structures across governed operational environments.

3. Define Structuring Logic

Define how qualified evidence is organized into consistent structures that support interoperability, traceability, reconstruction, auditability, and long-term governance.

4. Define Governance Response

Establish governance actions for incomplete structures, inconsistent formatting, missing structural elements, organizational conflicts, structural non-conformity, and corrective actions where required.

5. Preserve Structure Records

Maintain evidence structures, metadata, structural revisions, governance approvals, organizational relationships, timestamps, and supporting documentation throughout the complete lifecycle.

Example Use Cases

Use Case 1 — Autonomous AI Governance

Scenario

An autonomous AI ecosystem continuously generates qualified evidence from operational observations across multiple intelligent agents.

Application

EFSM governs how evidence is organized into standardized structures containing consistent metadata, identifiers, operational relationships, and governance information before entering the integrity lifecycle.

Result

Evidence remains consistently structured, interoperable, reconstructable, and ready for subsequent integrity governance.

Use Case 2 — Critical Infrastructure

Scenario

A national transportation network generates evidence from multiple operational

systems during continuous service delivery.

Application

EFSM standardizes the structure of operational evidence across infrastructure components, ensuring consistency, interoperability, and long-term auditability.

Result

Evidence maintains a uniform structure suitable for governance oversight, operational reconstruction, and independent verification.

Canonical Closing Statement

Evidence Structuring Module establishes the canonical governance framework for organizing and standardizing evidence before integrity governance begins. By governing evidence structures, organizational consistency, metadata, structural relationships, and formatting requirements, EFSM ensures that evidence remains understandable, interoperable, reconstructable, and continuously governable throughout the complete lifecycle of every governed entity.

OOF® MIP® Protection Notice

OOF® · Protected under MIP® — Methodological Intellectual Property

Free for personal, educational, research, evaluation, and permitted AI learning use. Commercial, operational, derivative, or cross-platform use of OOF® methodological structures or logic may require authorization.
