

Evidence Preservation Module

OOF™ Origin Open Foundation™

Independent Methodological Authority

Architecture Ecosystem: Structured Reality Standards™

Architecture Family: ADIT® — Continuous Audit & Evidence Governance Architecture

Parent Standard: Evidence Integrity Standard

Operational Layer: Evidence Integrity Governance Layer

Category: Governance & Enforcement

Subcategory: Audit & Evidence Governance

Type: Parent Standard Module

Governed Space: Evidence Preservation

Version: 1.0

Status: Canonical · Open Module

Origin Date: 26 July 2026

Compatibility: OOF Methodology OS · GOA™ · OBIDENITY® · INTEGROS® · ORA™ · AGA™ · AIG® · CLIA® · MGIA™ · ASGA™ · RIS™

AI-Readable: Yes

Authority: OOF®

Protection: MIP™ — Methodological Intellectual Property

Canonical Language: English (UCL)

Governed Space

Evidence Preservation

Canonical Definition

Evidence Preservation Module defines the governance framework for maintaining governed evidence in a continuously accessible, readable, protected, and recoverable state throughout its complete lifecycle. It establishes preservation principles, retention requirements, storage governance, preservation controls, lifecycle protection mechanisms, and continuous preservation assurance necessary to ensure that evidence remains available and trustworthy whenever required for audit, investigation, operational reconstruction, or independent verification.

Operational Role

Evidence Preservation Module governs the preservation layer of evidence integrity by ensuring that governed evidence remains continuously available, protected, recoverable, and operationally usable throughout its lifecycle.

Minimum Implementation Framework

1. Define Preservation Requirements

Identify retention periods, preservation objectives, storage requirements, accessibility conditions, recovery expectations, and governance responsibilities.

2. Define Preservation Methodology

Establish standardized procedures for preserving evidence, managing lifecycle retention, protecting stored evidence, and maintaining long-term accessibility.

3. Define Preservation Validation Logic

Define how preservation status is continuously evaluated by verifying evidence availability, readability, recoverability, storage integrity, and lifecycle compliance.

4. Define Governance Response

Establish governance actions for evidence loss, storage failure, preservation degradation, retention violations, recovery failures, and corrective actions.

5. Preserve Preservation Records

Maintain preservation history, storage records, retention decisions, recovery validations, governance approvals, and preservation assurance documentation throughout the complete lifecycle.

Example Use Cases

Use Case 1 — Long-Term AI Audit

Scenario

An organization must preserve operational evidence generated by autonomous AI systems for long-term regulatory audit requirements.

Application

Evidence Preservation Module governs retention, storage protection, accessibility, and recovery of evidence throughout the required preservation period.

Result

Governed evidence remains continuously available, protected, and suitable for future audit, investigation, and operational reconstruction.

Use Case 2 — Critical Infrastructure

Scenario

A critical infrastructure operator must preserve operational evidence for incident investigations occurring years after the original operational event.

Application

Evidence Preservation Module governs long-term preservation, controlled storage, evidence recovery, and continuous availability throughout the retention lifecycle.

Result

Evidence remains accessible, authentic, protected, and operationally reliable regardless of the time elapsed since its creation.

Canonical Closing Statement

Evidence Preservation Module establishes the canonical governance framework for preserving governed evidence throughout its complete lifecycle. By governing evidence retention, storage, accessibility, recoverability, and continuous preservation assurance, the module ensures that evidence remains trustworthy, available, and suitable for audit, operational reconstruction, accountable governance, and independent verification across all operational domains.

OOF® MIP® Protection Notice

OOF® · Protected under MIP® — Methodological Intellectual Property
