

Response Approval Module

OOF™ Origin Open Foundation™

Independent Methodological Authority

Architecture Ecosystem: Structured Reality Standards™

Architecture Family: ADIT® — Continuous Audit & Evidence Governance Architecture

Parent Standard: Audit Response Standard

Operational Layer: Audit Response Governance Layer

Category: Governance & Enforcement

Subcategory: Audit & Evidence Governance

Type: Parent Standard Module

Governed Space: Response Approval

Version: 1.0

Status: Canonical · Open Module

Origin Date: 30 July 2026

Compatibility: OOF Methodology OS · GOA™ · OBIDENITY® · INTEGROS® · ORA™ · AGA™ · AIG® · CLIA® · MGIA™ · ASGA™ · RIS™

AI-Readable: Yes

Authority: OOF®

Protection: MIP™ — Methodological Intellectual Property

Canonical Language: English (UCL)

Governed Space

Response Approval

Canonical Definition

Response Approval Module defines the governance framework for reviewing, evaluating, authorizing, rejecting, or requesting modification of planned audit responses before implementation. It establishes approval methodology, decision authorities, governance controls, approval criteria, and continuous approval assurance necessary to ensure that every audit response is formally authorized, accountable, and aligned with organizational governance objectives.

Operational Role

Response Approval Module governs the approval layer of audit response by ensuring that every response plan receives appropriate governance review and formal authorization before implementation begins.

Minimum Implementation Framework

1. Define Approval Requirements

Establish approval criteria, governance authorities, authorization thresholds, review responsibilities, decision requirements, and approval documentation standards.

2. Define Approval Methodology

Develop standardized procedures for reviewing response plans, evaluating proposed corrective actions, documenting approval decisions, and ensuring governance consistency.

3. Define Approval Validation Logic

Verify that approved response plans are evidence-based, feasible, governance-compliant, appropriately authorized, and aligned with organizational objectives.

4. Define Governance Response

Establish procedures for rejected plans, conditional approvals, requested revisions, governance conflicts, approval exceptions, and escalation mechanisms.

5. Preserve Approval Records

Maintain complete approval history, decision rationale, governance authorizations, reviewer comments, revisions, timestamps, and audit trails throughout the response lifecycle.

Example Use Cases

Use Case 1 — Autonomous AI Governance

Scenario

A governance committee reviews remediation plans following an audit of an autonomous AI platform.

Application

Response Approval Module governs the formal evaluation and authorization of each proposed corrective action before implementation.

Result

Only governance-approved response plans proceed to execution, ensuring accountability and organizational oversight.

Use Case 2 — Regulatory Compliance Audit

Scenario

A regulated organization prepares corrective action plans following an external compliance audit.

Application

Response Approval Module governs executive and regulatory approval of remediation plans before implementation begins.

Result

Every corrective action is formally authorized, documented, and traceable through governed approval procedures.

Canonical Closing Statement

Response Approval Module establishes the canonical governance framework for authorizing audit response plans. By governing approval methodology, decision authorities, governance controls, authorization criteria, and continuous approval assurance, the module enables accountable implementation, transparent governance, operational integrity, and independent verification across all operational domains.
