

Clean Tea Standard

OOF™ Origin Open Foundation™

Independent Methodological Authority

Category: Product & Design

Subcategory: Clean Tea

Standard: Clean Tea Standard

Version: 1.0

Status: Canonical · Open Standard

Effective Date: 17 March 2026

Compatibility: Origin Eco™ · Product Integrity Standards · Natural Systems

Canonical Definition

Clean Tea is a product category and preparation standard defining tea that remains uncontaminated, traceable, and integrity-preserved across its entire lifecycle — from harvesting to consumption.

Clean Tea is not defined by appearance or packaging, but by handling conditions, material contact integrity, and origin transparency.

Base

- Plant material is the source.
 - Handling defines integrity.
 - Output reflects the full lifecycle.
-

Scope

This standard applies to:

- loose leaf tea
 - herbal tea
 - blended tea products
 - dried plant infusions
-

Core Principle

Final packaging does not determine quality.
Integrity is defined by the full journey of the product.

Source Integrity

Tea must originate from:

- identifiable source or region
-

- controlled harvesting conditions
- material suitable for human consumption

Mixed-origin products must maintain traceability of all components.

Handling Integrity

Throughout its lifecycle, tea must not be treated as bulk industrial material.

Minimum conditions:

- controlled collection
- separation of batches
- prevention of contamination

Improper handling degrades product integrity irreversibly.

Material Contact Rule

Tea must avoid:

- plastic contact during harvesting, drying, storage, or transport
- synthetic surfaces that may introduce contamination

Preferred materials:

- natural fibers (e.g. cotton)
 - wood or bamboo
 - inert, non-reactive surfaces
-

Processing Integrity

Processing must ensure:

- no chemical treatment
- no synthetic additives
- preservation of natural plant structure

Drying must occur under clean and controlled conditions.

Packaging Integrity

Packaging must not:

- introduce contamination
- release microplastics
- alter product composition

Preference:

- loose leaf formats
 - natural, non-synthetic materials
-

Output Definition

Clean Tea is defined as:

Tea that remains uncontaminated, traceable, and structurally preserved across harvesting, processing, storage, and delivery.

Integrity Rules

The following are not permitted:

- unknown or non-traceable origin
 - plastic-based processing or storage
 - chemical contamination
 - misleading representation of product quality
-

Methodology

1. Identify source
 2. Harvest under controlled conditions
 3. Handle using clean materials
 4. Dry and process without contamination
 5. Store and transport under integrity conditions
 6. Output = Clean Tea
-

Use Context

- daily consumption
 - premium tea production
 - health-oriented products
 - natural infusion systems
-

Positioning

Not defined by packaging.

Not defined by marketing.

Defined by integrity of the entire process.

Canonical Closing Statement

Clean tea is not a product category.

It is a lifecycle integrity standard.

Module Architecture

→ Bagged Clean Tea

→ Blended Clean Tea

→ Loose Leaf Clean Tea
