

Classification Review Module (CRM)

Architecture Ecosystem: Structured Reality Standards™
Architecture Family: CLA™ — Classification Architecture
Parent Standard: Classification Validation Standard (CVS)
Operational Layer: Classification Validation Governance Layer
Category: Governance & Classification
Subcategory: Classification Governance
Type: Parent Standard Module
Governed Space: Classification Review
Version: 1.0
Status: Canonical · Open Module
Origin Date: 4 August 2026
Compatibility: OOF Methodology OS · GOA™ · OBIDENTITY® · INTEGROS® ·
ORA™ · AGA™ · AIG® · CLIA® ·
MGIA™ · ASGA™ · RIS™
AI-Readable: Yes
Authority: OOF®
Protection: MIP® — Methodological Intellectual Property
Canonical Language: English (UCL)

Governed Space

Classification Review

Canonical Definition

Classification Review Module defines the governance framework for performing structured, independent, and repeatable reviews of classification decisions throughout their complete lifecycle. It establishes review methodology, governance controls, evaluation criteria, improvement mechanisms, and continuous review governance necessary to ensure that classifications remain accurate, relevant, consistent, justified, and continuously improved over time.

Operational Role

Classification Review Module governs the review layer of classification governance by systematically evaluating classification methodology, governance effectiveness, review outcomes, identified improvement opportunities, and long- term classification performance.

Minimum Implementation Framework

1. Define Review Requirements

Establish review objectives, governance requirements, evaluation criteria, review frequency, responsible authorities, and expected outcomes.

2. Define Review Methodology

Develop standardized procedures for reviewing classification decisions, evaluating governance effectiveness, documenting observations, identifying improvement opportunities, and reporting review results.

3. Define Review Validation Logic

Verify that classification decisions remain accurate, evidence-based, governance-compliant, methodologically consistent, operationally relevant, and capable of continuous improvement.

4. Define Governance Response

Establish procedures for review findings, classification improvements, governance deficiencies, reassessment requirements, corrective actions, reclassification, and continuous enhancement initiatives.

5. Preserve Review Records

Maintain review reports, governance decisions, improvement actions, validation history, approvals, timestamps, lessons learned, and complete audit trails throughout the classification lifecycle.

Use Case 1 — Autonomous AI Governance

Scenario

An organization performs periodic reviews of AI-generated classifications used in autonomous operational decision-making.

Application

Classification Review Module governs structured evaluation of classification methodology, governance performance, review findings, and opportunities for continuous improvement.

Result

Classification quality continuously evolves while remaining accurate, transparent, consistent, and operationally trustworthy.

Use Case 2 — Regulatory Classification Oversight

Scenario

A regulatory authority performs periodic reviews of classification practices across multiple regulated organizations.

Application

Classification Review Module governs systematic assessment of classification quality, governance effectiveness, review outcomes, and improvement initiatives.

Result

Classification governance remains consistently effective, continuously improved, and aligned with long-term governance objectives.

Canonical Closing Statement

Classification Review Module establishes the canonical governance framework for continuously reviewing and improving classification governance. By governing review methodology, governance evaluation, improvement mechanisms, validation procedures, and continuous review governance, the module enables trustworthy classification, operational excellence, accountable governance, and independent verification across all operational domains.
