

Exhibition Mode Module (EMM™)

OOF™ Origin Open Foundation™

Independent Methodological Authority

Category: AI and Interpretation

Subcategory: Representation and Copy

Module: Exhibition Mode Module (EMM™)

Type: Usage Classification Module

Standard: Representation & Copy Standard (RCS™)

Status: Canonical Module

Version: 1.0

Effective Date: 19 March 2026

Canonical Definition

The Exhibition Mode Module (EMM™) defines how an asset is presented, used, or made accessible within a specific context.

Exhibition mode determines the conditions of use without changing the structural classification of the asset.

Why This Matters

Without defined exhibition modes:

- the same asset may be used inconsistently
- commercial and non-commercial use may be confused
- representation and sale may overlap
- access conditions become unclear

Exhibition mode separates what the asset is from how it is used.

Minimum Implementation Framework (MIF)

Step 1 — Identify the Asset

Define the asset being used.

Step 2 — Define Usage Context

Determine how the asset is being presented or used.

Step 3 — Assign Exhibition Mode

Classify the usage into one of the following modes:

- display
 - commercial
-

- educational
- virtual

Step 4 — Align with Authorization

Ensure the selected mode is consistent with granted rights.

Step 5 — Declare Mode

The mode of use must be clearly defined.

Use Case 1 — Museum Display

Scenario

An artwork is exhibited in a physical or virtual museum.

Application

The asset is classified under display or educational mode.

Result

- clear usage conditions
 - controlled access
 - preservation of asset integrity
-

Use Case 2 — Commercial Sale

Scenario

Copies or representations are offered for sale.

Application

The asset is classified under commercial mode.

Result

- clear monetization context
 - defined usage boundaries
 - alignment with authorization
-

Structural Principle

The nature of an asset does not change.
Only its mode of use does.

Closing Statement

What something is remains constant.
How it is used defines its context.
