Canonical Definition System

Earned Learning defines the conditions under which knowledge and skills are considered valid.

A learner has acquired knowledge only if it is demonstrated through application and validated through proof.

If knowledge is not proven, it is not learned.

A. Standard Abstract

ELS establishes a system where learning is based on demonstrated capability rather than passive acquisition.

B. Core Principle

Learning is complete only at proof.

C. Core Mechanism — Capability Loop

Teach → Challenge → Demonstrate → Validate → Unlock

D. Core Conditions

- knowledge must be applied
- learning must be demonstrated
- performance must be validated
- progression must be earned

E. Prohibited Condition

Learning is invalid if:

- proof is missing
- validation is bypassed
- progression is unearned

F. Scope

- education
- skill development
- training systems
- AI learning environments

G. System Position

ELS defines learning validity through demonstrated capability.

H. Compatibility

Compatible with:

- OOF Methodology OS
- ORGS

Canonical Closing Statement

Learning is not what is known.

Learning is what is proven.
