

Human Cognition Integrity Standard (HCIS)

Architecture Family: Human Cognition Governance

Operational Layer: Human Cognition Integrity Layer

Category: AI & Interpretation

Subcategory: Human Cognition Governance Architecture

Defines the conditions under which human cognition remains self-governed, reality-aligned, judgment-capable, cognitively autonomous, and operationally valid during interaction with AI systems, information systems, autonomous agents, and future cognition-enhancing technologies.

HCIS addresses judgment integrity, metacognitive awareness, cognitive autonomy, reality alignment, responsibility ownership, and cognitive dependency drift in human cognition environments.

Relevant for AI-assisted decision-making, human-AI collaboration, education, professional analysis, cognitive augmentation systems, organizational decision environments, autonomous-system supervision, and future human cognition governance architectures.
