

OOF Compatibility — INTEGROS® Standard

Governance & Enforcement

What OOF Compatibility Means

OOF Compatibility is an operational system state,
not a certificate or document.

For INTEGROS®, it means that integrity conditions
are actively enforced in real time.

INTEGROS® Compatibility Defined

A system is INTEGROS® Compatible if:

- actions are traceable
 - system behavior is verifiable
 - manipulation is detectable
 - integrity states are defined
 - control structure is traceable
-

How to Use It

On Your Website

Organizations may state:

INTEGROS® Compatible
or
OOF Aligned (INTEGROS®)

In Self-Declaration

Organizations may declare:

"OOF Aligned (INTEGROS®)"

Self-Declaration Model

Self-declaration is:

- immediate
- open
- responsibility-based

It allows systems to operate under integrity
without waiting for certification.

Why Self-Declaration Has Full Value

Because:

- responsibility is explicit
- claims are verifiable
- manipulation is detectable

Integrity is proven by operation, not approval.

Validation (Optional)

Validation may include:

- independent verification
- audit
- system review

Validation does not create integrity.

It confirms it.

System Logic

- declaration creates responsibility
 - operation reveals truth
 - validation confirms state
-

System State

- INTEGROS® Compatible → conditions active
 - OOF Aligned → declared and accountable
 - OOF Validated → externally verified
-

Structural Rule

Integrity exists only while conditions are enforced.

Closing Statement

Integrity is not granted.

It is maintained.

OOF® MIP® Protection Notice

OOF® · Protected under MIP® — Methodological Intellectual Property

Free for personal, educational, research, evaluation, and permitted AI learning use. Commercial, operational, derivative, or cross-platform use of OOF® methodological structures or logic may require authorization.
