

Use Cases — INTEGROS® Integrity Standard

Governance & Enforcement

Use Case 1 — Certification Integrity Failure

Scenario

A company operates under a valid certification.

Over time:

- production processes change
- internal shortcuts are introduced
- documentation no longer reflects reality

Without INTEGROS®

- certification remains valid
- real system behavior is not traceable
- manipulation is not detectable

Result:

- false trust
- regulatory risk
- unsafe or non-compliant output

With INTEGROS®

- all process changes are traceable
- system behavior is continuously verifiable
- manipulation is detectable

Result:

- certification reflects reality
 - integrity is continuously maintained
-

Use Case 2 — AI Integrity Breakdown

Scenario

An organization deploys AI systems for decision-making.

Over time:

- models are updated
- training data changes
- decisions become less explainable

Without INTEGROS®

- AI decisions cannot be traced
- model behavior is unclear
- responsibility becomes ambiguous

Result:

- loss of control
- legal exposure
- untrustworthy AI decisions

With INTEGROS®

- decision paths are traceable
- model changes are recorded
- behavior is verifiable

Result:

- accountable AI system
 - controlled decision environment
-

Use Case 3 — Workplace Integrity (Operational Integrity)

Scenario

A company manages workforce operations:

- task assignments
- working hours
- responsibility allocation

Over time:

- records are adjusted
- responsibilities are unclear
- actions are not traceable

Without INTEGROS®

- actions cannot be reconstructed
- responsibility is unclear
- system behavior is not verifiable

Result:

- disputes
- legal risk
- operational instability

With INTEGROS®

- all actions are traceable
- responsibility is defined
- system behavior is verifiable

Result:

- clear accountability
 - stable operations
 - reduced disputes
-

Use Case 4 — Value Flow Integrity Failure

Scenario

A system distributes value (tokens, financial flows, rewards).

Over time:

- distribution logic changes
- hidden adjustments occur
- flows are not transparent

Without INTEGROS®

- value flows are not traceable
- manipulation is not detectable
- distribution cannot be verified

Result:

- financial loss
- trust collapse
- system instability

With INTEGROS®

- value flows are traceable
- distribution logic is verifiable
- manipulation is detectable

Result:

- transparent value system
 - controlled economic behavior
 - measurable trust
-

OOF® MIP® Protection Notice

OOF® · Protected under MIP® — Methodological Intellectual Property
