

# About Integrity Definition Standard - (INDS)

## Defining Integrity

Integrity cannot be governed until its meaning has been clearly established. Every governed entity requires a shared understanding of what integrity represents before it can be measured, evaluated, preserved, restored, or independently verified.

---

## What Is Integrity Definition Standard?

Integrity Definition Standard (INDS) is the foundational Parent Standard of INTEGROS® — Integrity Governance Architecture. It establishes the canonical governance conditions required to formally define integrity for any governed entity, creating the reference point for all subsequent integrity governance activities.

---

## Canonical Definition

Integrity Definition Standard (INDS) defines the structural conditions under which the meaning of integrity is formally established for any governed entity, enabling integrity to be consistently identified, interpreted, measured, governed, and independently verified throughout its complete lifecycle.

---

## Why INDS Exists

Different organizations, systems, and industries often use the word integrity with different meanings. Without a common definition, integrity cannot be governed consistently, measurements become incomparable, and governance decisions lose their reliability.

INDS exists to establish a single governed reference that defines what integrity means before any assessment or governance process begins.

---

## What INDS Governs

INDS governs the definition of integrity, including:

- integrity meaning
- integrity boundaries
- integrity criteria
- integrity context
- integrity scope
- integrity interpretation
- governance reference conditions.

This governed space creates the foundation upon which every other integrity

---

governance activity depends.

---

## Architectural Position

Within INTEGROS® — Integrity Governance Architecture, INDS is the first Parent Standard in the governance flow:

Definition → Structure → Conditions → Measurement → State → Deviation → Breach  
→ Response → Restoration → Assurance

Every subsequent Parent Standard relies on the integrity definition established by INDS.

---

## Canonical Closing Statement

Integrity Definition Standard establishes the governed meaning of integrity before integrity is measured, evaluated, preserved, restored, or assured. By defining integrity first, INDS provides the foundational reference upon which the entire INTEGROS® Integrity Governance Architecture is built.

---
