

Integrity Restoration Evidence Module (IREVM)

OOF™ Origin Open Foundation™

Independent Methodological Authority

OriginID: OOF-OID-INTEGROS-IRRS-IREVM-2026-07-21-0004

Architecture Ecosystem: Structured Reality Standards™

Architecture Family: INTEGROS® — Integrity Governance Architecture

Parent Standard: Integrity Restoration Standard (IRRS)

Operational Layer: Meta-Integrity Governance Layer

Category: Governance & Enforcement

Subcategory: Integrity Governance

Type: Parent Standard Module

Governed Space: Integrity Restoration Evidence

Version: 1.0

Status: Canonical · Open Module

Origin Date: 21 July 2026

Compatibility: OOF Methodology OS · GOA™ · OBIDENTITY® · ART™ · ORA™ · AGA™ · AIG® · CLIA® · MGIA™ · ASGA™

AI-Readable: Yes

Authority: OOF®

Protection: MIP™ — Methodological Intellectual Property

Canonical Language: English (UCL)

Governed Space

Integrity Restoration Evidence

Canonical Definition

Integrity Restoration Evidence Module (IREVM) defines the governance framework for collecting, validating, preserving, and governing evidence demonstrating that integrity has been successfully restored. It establishes the evidence requirements, validation principles, traceability mechanisms, preservation rules, and governance controls required to support objective proof of integrity restoration throughout the complete lifecycle of a governed entity.

Operational Role

IREVM governs the evidence layer of integrity restoration by ensuring that every restoration decision is supported by sufficient, trustworthy, traceable, and auditable evidence.

Minimum Implementation Framework

1. Define Restoration Evidence Requirements

Identify the evidence required to demonstrate restored integrity, including validation results, operational records, governance approvals, technical evidence, and supporting documentation.

2. Define Evidence Methodology

Establish standardized procedures for evidence collection, verification, classification, preservation, traceability, and governance management.

3. Define Evidence Validation Logic

Define how restoration evidence is evaluated for authenticity, completeness, consistency, reliability, traceability, evidentiary integrity, and compliance with the approved governance methodology.

4. Define Governance Response

Establish governance actions for missing evidence, insufficient proof, conflicting evidence, evidence integrity failures, corrective evidence collection, and escalation where necessary.

5. Preserve Evidence Records

Maintain restoration evidence repositories, validation reports, governance approvals, chain-of-custody records, supporting documentation, timestamps, and audit archives throughout the complete lifecycle.

Example Use Cases

Use Case 1 — Autonomous AI Governance

Scenario

An autonomous AI platform completes integrity restoration and requests formal approval to resume unrestricted autonomous operation.

Application

IREVM governs the collection and validation of operational evidence demonstrating that approved integrity conditions have been fully restored and documented.

Result

The restoration decision is supported by objective, traceable, and fully auditable governance evidence before operational approval is granted.

Use Case 2 — Aviation Safety Systems

Scenario

An aviation operator restores flight management systems following an integrity breach affecting operational safety.

Application

IREVM governs the collection, verification, preservation, and traceability of restoration evidence required by internal governance authorities and aviation regulators.

Result

Integrity restoration is supported by complete, trustworthy, and regulator-ready evidence, ensuring accountable return to safe operational service.

Canonical Closing Statement

Integrity Restoration Evidence Module establishes the canonical governance framework for governing evidence that demonstrates successful integrity restoration. It ensures that every restoration decision is supported by objective, trustworthy, traceable, and fully auditable evidence throughout the complete lifecycle of every governed entity.
