

Integrity Rule Module (IRM)

OOF™ Origin Open Foundation™

Independent Methodological Authority

OriginID: OOF-OID-INTEGROS-ICS-IRM-2026-07-17-0005

Architecture Ecosystem: Structured Reality Standards™

Architecture Family: INTEGROS® — Integrity Governance Architecture

Parent Standard: Integrity Condition Standard (ICS)

Operational Layer: Meta-Integrity Governance Layer

Category: Governance & Enforcement

Subcategory: Integrity Governance

Type: Parent Standard Module

Governed Space: Integrity Rules

Version: 1.0

Status: Canonical · Open Module

Origin Date: 17 July 2026

Compatibility: OOF Methodology OS · GOA™ · OBIDENTITY® · ART™ · ORA™ · AGA™ · AIG® · CLIA® · MGIA™ · ASGA™

AI-Readable: Yes

Authority: OOF®

Protection: MIP™ — Methodological Intellectual Property

Canonical Language: English (UCL)

Governed Space

Integrity Rules

Canonical Definition

Integrity Rule Module (IRM) defines the governance rules that regulate how integrity conditions are applied, interpreted, enforced, and maintained throughout the complete lifecycle of a governed entity. It establishes the canonical rule set that transforms integrity conditions into consistent and governable operational behavior.

Operational Role

IRM governs the rule layer of integrity conditions. It ensures that integrity is preserved through explicit governance rules rather than discretionary interpretation, enabling consistent decision-making across every stage of the integrity lifecycle.

Minimum Implementation Framework

1. Define Integrity Rules

Identify every governance rule required to preserve integrity. Define mandatory rules governing acceptable behavior, operational decisions, structural consistency, condition enforcement, and integrity preservation.

2. Define Rule Requirements

Establish the governance requirements that determine how integrity rules are interpreted, prioritized, applied, monitored, and enforced across the governed entity.

3. Define Rule Violation Logic

Identify the conditions under which an integrity rule is violated, ignored, bypassed, contradicted, or becomes inconsistent with the governance conditions required to preserve integrity.

4. Define Governance Response

Define governance actions for enforcing, correcting, escalating, overriding through authorized governance procedures, or revising integrity rules whenever violations or operational changes occur.

5. Preserve Rule Records

Preserve integrity rule definitions, governance approvals, revisions, exception records, enforcement history, supporting evidence, and rule lifecycle documentation throughout the complete lifecycle.

Example Use Cases

Use Case 1 — AI Governance Platform

Scenario

An enterprise AI platform operates under governance rules requiring explainable decision-making, human oversight for high-risk actions, and continuous compliance with organizational AI policies.

Application

IRM defines and governs these integrity rules, ensuring that every operational decision follows the approved governance framework.

Result

The AI platform maintains consistent integrity by applying the same governed rules across all autonomous and human-supervised operations.

Use Case 2 — Pharmaceutical Manufacturing

Scenario

A pharmaceutical manufacturer must comply with strict production rules

governing quality assurance, process validation, documentation, contamination control, and regulatory compliance.

Application

IRM establishes these integrity rules as mandatory governance requirements and ensures they are consistently applied throughout the production lifecycle.

Result

Manufacturing integrity is preserved through governed operational rules, reducing regulatory risk and maintaining consistent product quality.

Canonical Closing Statement

Integrity is preserved through governed rules that are consistently applied and enforced. Integrity Rule Module establishes the canonical governance framework that transforms integrity conditions into repeatable, transparent, and independently governable operational practice throughout the complete lifecycle of every governed entity.

OOF® MIP® Protection Notice

OOF® · Protected under MIP® — Methodological Intellectual Property

Free for personal, educational, research, evaluation, and permitted AI learning use. Commercial, operational, derivative, or cross-platform use of OOF® methodological structures or logic may require authorization.
