

Join OOF™

Open Contribution Roles (Global · Remote)

OOF™ (Origin Open Foundation™) is building an independent, methodology-driven infrastructure for standards, governance frameworks, and integrity architectures across AI, ecology, identity, and value systems.

OOF™ operates as an independent methodological authority defining system-level standards across multiple domains.

OOF™ is building a new category of system-level standards connecting identity, integrity, execution, and responsibility into a unified methodology framework.

We are currently in an early-stage build phase. Many roles are **contribution-based at the start**, with a structured pathway toward **funded roles** and **independent implementation partnerships** as grants, institutional collaborations, and contracts are secured.

Working language: English (canonical standard language)

Work mode: Remote / global (asynchronous-friendly)

Core need right now: People who build and ship (documentation, web, structure)

What We Need Most Right Now

1) Web & HTML Implementation (High Priority)

For people who can help improve and maintain the website structure and pages.

Examples:

- Static websites (GitHub Pages), HTML/CSS, lightweight JS
- Clean page layouts, navigation structure, internal linking
- Consistent formatting of standards pages and "About" pages
- Performance, accessibility, and simple SEO fundamentals

Role titles:

- Systems & Website Contributor
 - Web Implementation Contributor
 - Documentation-to-Web Publisher
-

2) Standards & Documentation Editors (High Priority)

For people who can polish English, improve clarity, and keep documents consistent.

Examples:

- Editing standards text for clarity, consistency, and regulator-grade tone
 - Maintaining unified structure (headers, sections, canonical definitions)
 - Building templates and checklists for adoption and self-declaration
-

Role titles:

- Standards Development Contributor
 - Documentation Editor (English)
 - Governance Framework Contributor
-

3) Implementation Framework Builders

For people who can convert standards into minimal implementation blueprints.

Examples:

- Creating minimum implementation frameworks
- Self-declaration templates and checklists
- Adoption guidance usable by small and medium organizations

Role titles:

- Implementation Framework Coordinator
 - Standards Adoption Contributor
 - Governance Implementation Facilitator
-

4) Data / Registry / Database Contributors (Future-Core)

For people experienced in building structured registries and simple databases.

Examples:

- Schema design for standards registry
- Index pages, identifiers, versioning logic
- Foundations for a future public reference database

Role titles:

- Data Systems Contributor
 - Registry Architecture Contributor
 - Database & Indexing Contributor
-

5) Grants & Institutional Funding (Strategic)

For people who know how to secure grants, partnerships, or institutional funding.

Examples:

- Grant research, application drafting, partnership outreach
- Funding strategy, eligibility mapping, proposal writing

Role titles:

- Institutional Funding Coordinator
 - Grants & Partnerships Coordinator
 - Strategic Funding Liaison
-

6) Systems & Architecture Contributors (Strategic Core)

For people who think in systems, structures, and cross-layer architecture.

Examples:

- Connecting standards across identity, integrity, execution, and responsibility
- Structuring new methodology layers
- Defining relationships between modules and frameworks

Role titles:

- Systems Architecture Contributor
 - Methodology Structure Contributor
 - Cross-Layer Framework Designer
-

Contribution Model (Transparent & Professional)

- Early roles are **contribution-based during the build phase.**
- Contributors who actively build core infrastructure are **prioritized for future funded roles and partnerships.**

As OOF™ grows, roles may evolve into:

- funded positions (part-time or full-time)
- commission-based coordination (case-by-case)
- independent third-party implementation partnerships
- direct collaboration within OOF™ operational structures

OOF™ maintains structural ownership under **MIP™ (Methodological Intellectual Property).**

If You Don't Fit a Listed Role

If you want to contribute but don't see a perfect match above, contact us anyway.

Tell us:

- what you can do
- what you want to focus on (AI / eco / identity / web / registry / funding)
- how much time you can contribute weekly

We will try to place you into a suitable role within the OOF™ infrastructure.

If there is no immediate match, a suitable role may open in the next phase.

How to Apply / Contact

Send a short message with:

1. Your name + location/timezone
-

2. Skills (bullet list)
3. Links (GitHub / website / writing samples / LinkedIn)
4. Your preferred focus area
5. Weekly availability (hours)

Contact: originopenfoundation@gmail.com

Closing Statement

OOF™ is not built by declarations.

It is built by people who structure systems and make them real.

OOF® MIP® Protection Notice

OOF® · Protected under MIP® — Methodological Intellectual Property

Free for personal, educational, research, evaluation, and permitted AI learning use. Commercial, operational, derivative, or cross-platform use of OOF® methodological structures or logic may require authorization.

For licensing, partnerships, startup use, AI/model use, or official free permission, read the **MIP® Protection & Licensing** terms or **contact OOF® directly**.

Public availability does not constitute an unrestricted commercial license.

Active Protection & Compatibility Detection applies.
