

Original Asset Module (OAM™)

OOF™ Origin Open Foundation™

Independent Methodological Authority

Category: AI and Interpretation

Subcategory: Representation and Copy

Module: Original Asset Module (OAM™)

Type: Core Classification Module

Standard: Representation & Copy Standard (RCS™)

Status: Canonical Module

Version: 1.0

Effective Date: 19 March 2026

Canonical Definition

An Original Asset is the primary source of a work from which all copies, reproductions, or representations derive.

An original asset defines the reference point of authenticity, authorship, and value.

Only one original asset exists per defined work unless explicitly structured otherwise.

Why This Matters

Without a clearly defined original:

- copies cannot be distinguished
- value cannot be anchored
- ownership becomes ambiguous
- representation loses meaning

The original asset establishes:

- reference
 - authenticity
 - structural truth
-

Minimum Implementation Framework (MIF)

Step 1 — Identify the Source

Define the asset that represents the origin of the work.

Step 2 — Assign Origin Status

Confirm that the asset is not derived from another asset.

Step 3 — Establish Reference

All copies and representations must be linked to this original.

Step 4 — Preserve Integrity

The original asset must remain identifiable and distinguishable from all derived forms.

Use Case 1 — Museum Artwork

Scenario

A museum holds a physical painting considered the original work.

Application

The painting is defined as the original asset under OAM™.

Result

- all reproductions reference the original
 - authenticity is preserved
 - valuation remains anchored
-

Use Case 2 — Digital Original Creation

Scenario

A digital artwork is created as a primary work without physical form.

Application

The digital file is defined as the original asset.

Result

- digital origin is established
 - copies are clearly distinguished
 - ownership and value are preserved
-

Structural Principle

Without an original, there is no reference.
Without reference, there is no structure.

Closing Statement

Every system of value begins with a single point of origin.
