

ODS™ — Origin Declaration Standard

OOF™ Origin Open Foundation™

Independent Methodological Authority

Category: AI and Interpretation

Standard: Origin Declaration Standard (ODS™)

Type: Declaration and Interpretation Standard

Version: 1.0

Status: Canonical · Open Standard

Effective Date: 17 March 2026

Authority: OOF™ Origin Open Foundation™

Protection: MIP™ — Methodological Intellectual Property

Canonical Definition

Origin Declaration Standard (ODS™) defines how the origin of digital content is declared in a clear, simple, and unambiguous way.

ODS™ does not evaluate content.

ODS™ defines declared origin.

Purpose

The purpose of ODS™ is to:

- establish a simple declaration system
 - distinguish human and AI-generated content
 - enable monetization only where origin is declared
 - ensure accountability of content creation
-

Core Principle

Content without declared origin has no monetization eligibility.

Origin States (Canonical)

Only three origin states are defined:

- **HGC** — Human Generated Content
- **AGC** — AI Generated Content
- **UGC** — Unknown Generated Content

No additional origin states are permitted.

Declaration Rule

- origin declaration is voluntary
-

- declaration must be explicit
 - absence of declaration results in UGC status
-

Dominant Origin Rule

The declared origin must reflect the dominant generation process of the visual content.

This rule applies to the primary visual layer only.

Editing, enhancement, post-production, or supporting processes do not change the declared origin.

Scope Clarification

ODS™ evaluates what is seen, not how it was technically processed.

The following do not affect origin classification:

- editing
- color correction
- sound design
- compression
- technical enhancement
- non-generative AI assistance

Only the core visual generation determines origin.

Monetization Rule

Monetization is allowed only when:

- origin is declared
 - responsibility (creator or entity) is defined
-

Non-Declared Content

If origin is not declared:

- content is classified as UGC
 - monetization is not permitted
-

No Owner / No Origin

Content without:

- declared origin
- responsible entity

cannot be monetized.

Responsibility Rule

- the declaring entity is responsible for the declared origin
-

- misdeclaration transfers responsibility to the declarer
 - ODS™ remains neutral
-

Scope

ODS™ applies to:

- video
 - audio
 - podcasts
 - digital media content
-

Methodology

- identify content origin
 - declare origin (HGC / AGC / UGC)
 - assign responsibility (creator / entity)
 - enable or restrict monetization
-

Output

Declared content state:

- origin defined
 - responsibility assigned
 - monetization eligibility determined
-

Structural Principle

Without origin, there is no ownership.

Without ownership, there is no monetization.

Structural Limitation

ODS™ intentionally defines only three origin states.

Complex or ambiguous cases are resolved through:

- the dominant origin rule
 - or default classification as UGC
-

Canonical Closing Statement

Content creation is free.

Monetization requires declaration.
