

OOF™ Standard Participation & Monetization Model

Early Adoption Structure and Economic Participation Framework

1. Core Principle

OOF™ standards are open for adoption.

Their economic layer is structured, limited, and selectively allocated.

Participation in monetization is not automatic.

It is granted based on early adoption, alignment, and strategic fit.

2. Structure of Participation

Economic participation is distributed through a time-based tier system.

Each tier represents a defined entry window and allocation capacity.

Total external participation is strictly limited.

3. Tiered Participation Model

Tier 1 — Early Adopters

Entry window: initial release phase

Allocation: up to 5% total (shared)

Conditions:

Active implementation and real operational use

Position:

Lowest entry valuation and highest strategic advantage

Tier 2 — Growth Adopters

Entry window: 6 to 12 months after initial release

Allocation: up to 5% total (shared)

Conditions:

Validated implementation and operational alignment

Position:

Increased valuation and reduced allocation availability

Tier 3 — Late Strategic Participants

Entry window: post-adoption growth phase

Allocation: up to 5% total (shared)

Conditions:

Established operational scale

Position:

Highest entry valuation and limited access

4. External Participation Cap

Maximum total external participation is limited to 20%.

All remaining ownership, control, and authority are permanently retained by:

OOF Origin Open Foundation™

5. Participation and Control

Participation in the economic layer provides **economic benefit only**.

It does not grant:

- ownership of the standard
- governance rights
- modification rights
- control over methodology or its evolution

The standard, its definition, and its governance remain exclusively under OOF™.

6. Economic Participation Scope

Participation provides access to **defined economic participation rights** linked to the standard.

Global Economic Exposure

By default, participation represents **global economic exposure**, meaning:

- participation is not limited to a specific geography
 - value is linked to the overall adoption and monetization of the standard
 - economic benefit reflects system-wide growth across markets
-

Limited Participation (Selective Cases)

In specific cases, participation may be limited to:

- defined geographic regions
- specific market segments
- particular implementation scopes

Such limitations are explicitly defined at the time of participation.

Nature of Economic Rights

Participation provides:

- proportional access to economic value generated through implementation and deployment
- exposure to the expansion and adoption of the standard

Participation does not provide:

- ownership of the standard
- rights to control or influence its definition
- authority over its governance

Key Principle

Participation grants access to the **economic layer of the standard**, not to the standard itself.

7. Monetization Structure

Monetization is generated through:

- implementation support
- enterprise integration
- licensing structures
- methodology deployment

OOF™ does not sell standards.

OOF™ builds economic layers around them.

8. Adoption and Monetization

Monetization is not dependent on immediate large-scale adoption.

Without adoption, participation represents:

- a strategic position
- alignment with future system structures

With adoption, participation may generate:

- revenue
 - scalability
 - long-term value
-

9. Technology Independence

OOF™ standards are:

- technology-independent
- methodology-based
- structurally defined

They remain valid regardless of technological change.

10. Investment Nature

Participation is not:

- a guaranteed return
- a short-term financial instrument
- dependent on a single technological cycle

It represents long-term positioning within evolving system structures.

11. Confidential Monetization Structure

All monetization arrangements are:

- private
- selectively negotiated
- not publicly distributed

Access is granted based on:

- strategic alignment
 - implementation commitment
 - timing within tier structure
-

12. Market Neutrality

OOF™ does not engage in marketing, promotion, or artificial acceleration of any standard.

OOF™ does not:

- promote adoption
- create demand
- influence market preference

The market independently determines:

- what is adopted
 - what scales
 - what remains unused
-

13. No-Pressure Monetization Principle

Monetization does not create:

- pressure to adopt
- artificial incentives
- obligation to implement

Adoption validates monetization, not the reverse.

14. Transparency and Market Reality

All participants acknowledge:

- outcomes are uncertain
- adoption timelines are unpredictable
- market validation is independent

Participation represents exposure, not guaranteed outcome.

15. Partner Selection and Authority

OOF™ retains full authority over participation decisions.

OOF™ determines:

- partner selection
- timing of participation
- access conditions

Participation is selective, not open.

16. Right of Refusal

OOF™ reserves the right to:

- refuse participation
 - limit or deny access
 - protect system integrity
-

17. Buyback Right

OOF™ retains the right to repurchase allocated participation:

- under predefined conditions
- at pre-agreed valuation structures

This ensures long-term control and alignment.

18. Positioning

OOF™ does not operate as:

- a marketing organization
- a sales-driven entity
- an open monetization platform

OOF™ operates as a methodological authority.

19. Methodology Protection & Attribution

This model is defined and protected under the OOF™ methodological framework (MIP™).

Its structure, terminology, and participation logic form a protected system.

Any direct implementation or use of this model must acknowledge
OOF Origin Open Foundation™ as the originating authority.

20. Closing Statement

OOF™ defines structure.

The market defines reality.

Meaning and standards remain.

Technology evolves.

Standards are carriers of structure.

Technology is a variable layer.

Standards define systems.

Participation defines who benefits from them.
