

OOF™ Standard Sign Usage

How to Use OOF™ Standard Signs When Applying OOF™ Standards

Purpose

This page defines how OOF™ standard signs may be used when organizations apply OOF™ standards in products, services, or internal systems.

It ensures consistent, transparent, and non-misleading communication of standard usage.

What Is an OOF™ Standard Sign

An OOF™ Standard Sign is a simple textual indication that a product or system is developed using OOF™ standards.

Example:

"OOF Compatible Standards"

The sign communicates alignment, not certification.

Allowed Use

Organizations may use OOF™ standard signs when:

- OOF™ standards are actually applied in development or production
 - implementation reflects real conditions defined by the standard
 - usage is truthful and not misleading
-

Product-Level Usage

For physical or small products, the standard sign may appear as:

"OOF Compatible Standards"

Conditions:

- no logo usage
- no modification of wording
- no implication of certification, approval, or audit

The sign must remain simple and neutral.

Website-Level Requirement

If a standard sign is used on a product, the organization must provide additional context on its website.

Minimum requirement:

- a clear statement explaining the use of OOF™ standards
- a visible and active link to the official source

Example:

This product is developed using OOF™ Compatible Standards.

Prohibited Use

The following is not allowed:

- use of OOF™ logo without authorization
 - statements implying certification or official validation
 - modified or misleading versions of the standard sign
 - use without real implementation of standards
-

Integrity Principle

OOF™ standard signs communicate implementation, not authority.

If implementation is not real, the sign must not be used.

One-Line Definition

An OOF™ standard sign indicates alignment with a standard, not certification.

Closing Statement

Clear communication enables trust.

OOF™ standard signs exist to reflect real usage, not to simulate credibility.
