

About Origin Integrity Standard (OIS)

Governing Origin Integrity

Origin Integrity Standard (OIS) defines the governance conditions under which the origin of a governed identity remains authentic, verifiable, attributable, traceable, and continuously governable throughout its complete lifecycle.

Every governed identity begins with an origin.

That origin establishes the governance foundation upon which identity, ownership, authority, responsibility, and trust are built.

OIS governs this identity governance space.

What Is Origin Integrity?

Origin integrity is the governed condition under which the origin of an identity can be established, verified, attributed, and continuously preserved throughout the complete identity lifecycle.

It enables organizations to establish trustworthy identity foundations, preserve attribution, validate origin authenticity, maintain governance continuity, and ensure that every governed identity remains connected to its legitimate origin.

Canonical Definition

Origin Integrity Standard (OIS) defines the structural conditions under which the origin of a governed identity remains authentic, verifiable, attributable, traceable, and continuously governable throughout its complete lifecycle.

Why OIS Exists

Governed identity cannot begin with ownership, authority, permission, or responsibility.

It must begin with a trustworthy origin.

OIS exists because origin represents the **first governable space** of **OBIDENTITY® — Origin-Bound Identity Governance Architecture**.

What OIS Governs

OIS governs the structural conditions under which identity origin remains:

- authentic,
-

- verifiable,
- attributable,
- traceable,
- trustworthy,
- governable.

Rather than governing identity technologies or identity management platforms, OIS governs the governance conditions required for establishing trustworthy identity origin.

Architectural Position

Origin Integrity Standard serves as the **first governance space** of **OBIDENTITY® — Origin-Bound Identity Governance Architecture**.

It establishes the governance foundation upon which identity, ownership, authority, permission, responsibility, provenance, transfer, continuity, and auditability are built.

Without governed origin, trustworthy governed identity cannot exist.

Canonical Closing Statement

Trustworthy identity begins with trustworthy origin. Origin Integrity establishes the governance foundation that enables every governed identity to remain authentic, verifiable, attributable, and continuously connected to its legitimate origin throughout its complete lifecycle.
