

Ownership Conflict Resolution Module (OCRM)

OriginID: OOF-OID-OBID-OWIS-OCRM-2026-07-12-0004
Architecture Ecosystem: Structured Reality Standards™
Architecture Family: OBIDENTITY® — Origin-Bound Identity
Governance Architecture
Operational Layer: Identity Governance Layer
Governed Space: Ownership Conflict Resolution
Category: Governance & Enforcement
Subcategory: Identity Governance
Type: Ownership Integrity Standard Module
Parent Standard: Ownership Integrity Standard (OWIS)
Version: 1.0
Status: Canonical · Open Module
Origin Date: 12 July 2026
Compatibility: OOF Methodology OS · GOA™ · ORA™ · AGA™ · AIG® · CLIA®
· MGIA™ · ASGA™
AI-Readable: Yes
Authority: OOF®
Protection: MIP™ — Methodological Intellectual Property
Canonical Language: English (UCL)

Canonical Definition

Ownership Conflict Resolution Module (OCRM) defines the structural conditions under which ownership conflicts involving a governed identity are identified, evaluated, resolved, documented, and continuously governable throughout the complete identity lifecycle.

OCRM governs ownership conflict resolution.

The module establishes the governance conditions required to ensure that competing ownership claims are resolved through legitimate, transparent, evidence-based, and governance-valid processes.

Ownership conflicts may occur.

Governance resolves them.

OCRM governs that resolution.

Module Operational Role

OCRM defines the ownership conflict resolution layer of OWIS.

Its role is to preserve legitimate ownership by governing the resolution of conflicting ownership claims.

Module Operational Space

OCRM governs:

- ownership conflict resolution,
- ownership dispute management,
- competing ownership claims,
- ownership investigation,
- governance-based ownership resolution,
- ownership reconciliation,
- conflict documentation,
- legitimate ownership restoration.

Module Function

The module applies wherever competing ownership claims or ownership disputes require governance-based resolution.

Minimum Implementation Framework

1. Define the Ownership Conflict Object

Identify the governed identity affected by an ownership conflict.

2. Define Conflict Resolution Conditions

Establish governance conditions governing ownership investigation, evidence evaluation, decision-making, and conflict resolution.

3. Define Conflict Failure Logic

Identify conditions where ownership conflicts remain unresolved, unsupported, inconsistent, biased, or governance- invalid.

4. Define Governance Response

Define governance actions for investigation, mediation, ownership determination, reassignment, escalation, or further review.

5. Preserve Conflict Resolution Records

Preserve ownership claims, governance decisions, supporting evidence, investigation records, and conflict history.

Use Case 1 — Competing AI Ownership Claims

Scenario

Two organizations claim ownership of the same governed AI identity.

Application

OCRM evaluates the competing ownership claims using governance-approved evidence and resolution procedures.

Result

The legitimate ownership relationship is established through a transparent and governance-valid process.

Use Case 2 — Enterprise Digital Identity Dispute

Scenario

An internal ownership dispute arises following organizational restructuring.

Application

OCRM governs the investigation and resolution of the ownership conflict before governance rights are reassigned.

Result

Ownership integrity is restored while preserving governance trust and accountability.

Canonical Closing Statement

**Ownership is strongest when it remains legitimate under challenge.
Ownership Conflict Resolution protects governance integrity by transforming competing claims into one evidence-based, governance-valid ownership relationship.**
