

Evidence Preservation Module (EPRM)

OriginID: OOF-OID-OBID-PRIS-EPRM-2026-07-15-0004
Architecture Ecosystem: Structured Reality Standards™
Architecture Family: OBIDENITY® — Origin-Bound Identity
Governance Architecture
Operational Layer: Identity Governance Layer
Governed Space: Evidence Preservation
Category: Governance & Enforcement
Subcategory: Identity Governance
Type: Provenance Integrity Standard Module
Parent Standard: Provenance Integrity Standard (PRIS)
Version: 1.0
Status: Canonical · Open Module
Origin Date: 15 July 2026
Compatibility: OOF Methodology OS · GOA™ · ORA™ · AGA™ · AIG® · CLIA®
· MGIA™ · ASGA™
AI-Readable: Yes
Authority: OOF®
Protection: MIP™ — Methodological Intellectual Property
Canonical Language: English (UCL)

Canonical Definition

Evidence Preservation Module (EPRM) defines the structural conditions under which evidence associated with the provenance of a governed identity remains authentic, preserved, accessible, verifiable, and continuously governable throughout the complete identity lifecycle.

EPRM governs evidence preservation.

The module establishes the governance conditions required to ensure that every governance-relevant record supporting the provenance of a governed identity remains protected against loss, alteration, unauthorized removal, or corruption.

History creates evidence.

Governance preserves that evidence.

EPRM governs its preservation.

Module Operational Role

EPRM defines the evidence preservation layer of PRIS.

Its role is to preserve the documentary foundation supporting the complete provenance of a governed identity.

Module Operational Space

EPRM governs:

- evidence preservation,
- provenance evidence,
- governance records,
- supporting documentation,
- evidence integrity,
- historical evidence,
- evidence continuity,
- identity evidence preservation.

Module Function

The module applies wherever organizations must preserve evidence supporting the provenance and governance history of a governed identity.

Minimum Implementation Framework

1. Define the Evidence Object

Identify the governance evidence requiring long-term preservation.

2. Define Preservation Conditions

Establish governance conditions governing evidence retention, protection, accessibility, integrity, verification, and lifecycle management.

3. Define Preservation Failure Logic

Identify conditions where evidence becomes lost, altered, inaccessible, incomplete, corrupted, or governance-invalid.

4. Define Governance Response

Define governance actions for evidence recovery, verification, restoration, investigation, replacement, or governance escalation.

5. Preserve Evidence Records

Preserve governance evidence, supporting documentation, verification results, historical records, retention history, and integrity controls.

Use Case 1 — Enterprise Identity Governance

Scenario

An organization must preserve all documents supporting the governance history of a strategic enterprise identity.

Application

EPRM protects and manages the evidence throughout the complete identity lifecycle.

Result

The provenance of the identity remains fully supported by authentic and verifiable governance evidence.

Use Case 2 — AI Identity Governance

Scenario

A governed AI identity accumulates governance records, approvals, operational logs, and lifecycle documentation over many years.

Application

EPRM preserves every governance-relevant record supporting the identity's provenance.

Result

The complete provenance remains evidence-supported, independently verifiable, and continuously governable.

Canonical Closing Statement

History can be questioned, but preserved evidence can answer. Evidence Preservation safeguards the documentary foundation that allows the provenance of a governed identity to remain trustworthy throughout the complete identity lifecycle.
