

Origin Asset™ Standard

OOF™ Origin Open Foundation™

Global Methodology Authority

OriginID: OOF-OID-ECO-ORG-2026-01-26-0008

Category: Economic & Value Standards (ECO)

Subcategory: Origin Asset™ (ORG)

Version: 1.0

Status: Canonical · Binding

Effective Date: 26 January 2026

Compatibility:

Methodology OS™: Compatible

Authority: OOF™ Origin Open Foundation™

Protection: MIP™ — Methodological Intellectual Property

Canonical Language: English (UCL™)

B. Standard Abstract

This standard defines Origin Asset™ as the initial admissible asset state within the OOF™ economic lifecycle.

It establishes the conditions under which an asset may enter the governed economic architecture without prior transition.

Origin Asset™ represents the foundational state from which value transitions may occur.

C. Canonical Definition

An Origin Asset™ is defined as an asset whose identity, authenticity, legality, and integrity are verified at the point of system admission.

Origin Asset™ is the initial state preceding any DeMonet™ or Value Asset classification.

D. Base

This standard is based on:

- Deterministic Asset State Architecture
- Verified Identity Principle
- Traceable Origin Requirement
- Canonical Admission Logic

Admission into economic architecture requires verification.

E. Purpose & Scope

Purpose

To define the lawful and structured entry state of assets into the governed economic lifecycle.

Scope

Applies to:

- newly created assets
 - newly registered digital systems
 - certified physical products
 - AI-generated outputs entering economic systems
-

F. Applicability

Origin Asset™ classification applies when:

- identity is established
- authorship or ownership is verified
- legality is confirmed
- no prior value removal has occurred

All admissions must be traceable.

G. Protocol

Origin Asset™ admission requires:

1. Identity verification
2. Authenticity validation
3. Compliance confirmation
4. Governance recording

All admissions must be traceable.

H. Classification & States

Origin Asset™ may transition to:

- Value Asset (if value is assigned)
- DeMonet™ (if violation occurs)

Direct transition to ZVA™ without DeMonet™ is invalid.

I. Licensing & Usage

Reference use permitted.

Operational admission systems require OOF™ license.

Derivative origin-state architectures require authorization under MIP™.

J. Compatibility & Dependencies

Compatible with:

- Economic State Architecture
 - Value Governance Framework
 - DeMonet™ Standard
-

K. Non-Compliance Consequences

Assets entering economic systems without Origin Asset™ admission are non-admissible within canonical systems.

Canonical Closing Statement

Every governed value must begin with verified origin.
