

Methodology Protection & Positioning™ Question Index

OOF Problem Space Intelligence Index™ (PSII™)

Protecting, Differentiating, Positioning, and Strengthening Methodology Assets

Many organizations invest significant time, expertise, resources, and knowledge into developing methodologies.

However, valuable methodologies often remain:

- unprotected,
- poorly positioned,
- difficult to differentiate,
- difficult to identify,
- difficult to communicate,
- difficult to commercialize.

Methodology Protection & Positioning™ exists to help organizations strengthen methodology assets through strategic protection, differentiation, positioning, classification, and long-term value preservation.

This Question Index™ provides a structured collection of questions designed to support methodology protection, positioning, ownership clarity, strategic differentiation, and market readiness.

The objective is not merely to protect methodologies.

The objective is to ensure methodologies remain identifiable, defensible, valuable, and strategically positioned over time.

Methodology Identity

What is the methodology called? Is the methodology name distinctive? Is the methodology easily identifiable? Does the methodology have a clear identity? Is the methodology consistently described? Can the methodology be distinguished from alternatives? Does the methodology require renaming? Is the methodology identity stable? Does the methodology identity support growth? Can the methodology be recognized independently?

Methodology Ownership

Who owns the methodology? Is ownership clearly documented? Can ownership be demonstrated? Are ownership rights protected? Are ownership claims disputed? Is ownership continuity preserved? Can ownership transfer be managed? Are contributors identified? Is intellectual ownership clear? Are ownership risks understood?

Methodology Differentiation

What makes the methodology unique? How does it differ from alternatives? Can differentiation be demonstrated? Are unique characteristics documented? Does the methodology solve problems differently? Can competitors easily replicate it? Are differentiators sustainable? Does differentiation create value? Is differentiation clearly communicated? Does differentiation support market positioning?

Methodology Protection

Can the methodology be protected? Should trademark protection be considered? Should methodology registration be considered? Are protection mechanisms documented? Are intellectual assets identified? Can future developments be protected? Are protection gaps present? Is methodology continuity preserved? Can protection strengthen adoption? Is long-term protection realistic?

Methodology Positioning

How should the methodology be positioned? Who is the intended audience? Which industries should be targeted? Which problems does the methodology address? Which opportunities does it create? Does positioning reflect methodology strengths? Is positioning clearly defined? Can positioning be improved? Does positioning support growth? Is positioning aligned with strategic objectives?

Methodology Communication

Is the methodology easy to explain? Is the methodology understandable? Are key messages clearly defined? Can non-experts understand its value? Are benefits clearly communicated? Are limitations clearly communicated? Does communication create confusion? Can communication be simplified? Is messaging consistent? Does communication support adoption?

Methodology Architecture Placement

Where does the methodology belong? Does it fit within a larger framework? Does it belong within a governance architecture? Can architectural relationships be identified? Are dependencies understood? Can architecture placement improve clarity? Are related methodologies known? Can architectural positioning increase value? Is methodology scope clearly defined? Does placement support long-term evolution?

Methodology Commercial Positioning

Can the methodology support commercial services? Can it support licensing? Can it support consulting? Can it support training? Can it support certification? Can it support software solutions? Does positioning improve commercialization? Is the target market clearly

defined? Are value propositions identified? Is commercial positioning realistic?

Methodology Reputation

Is the methodology trusted? Can trust be demonstrated? Is evidence available? Are references available? Can credibility be strengthened? Does the methodology have a track record? Are reputation risks known? Can reputation be measured? Does reputation support adoption? Is trust transferable across environments?

Long-Term Strategic Positioning

Will the methodology remain relevant? Can future versions be developed? Can new modules be added?

Can future standards emerge from it? Can future architectures evolve around it? Does positioning support longevity? Can methodology value increase over time? Is strategic direction clearly defined? Can future opportunities be identified? What is the long-term positioning strategy?

Methodology Protection & Positioning™

Methodology Protection & Positioning™ helps organizations strengthen methodology assets through strategic protection, differentiation, positioning, identity development, architectural placement, commercialization readiness, and long-term value preservation.

About the OOF Problem Space Intelligence Index™

The OOF Problem Space Intelligence Index™ (PSII™) is a growing collection of structured questions designed to help identify, understand, classify, and investigate problems before searching for solutions.

Questions are organized into categories, clusters, and problem environments to improve clarity, analysis, governance, and decision-making.

The objective is not merely to provide answers.

The objective is to ensure that the right questions are being asked.
