

Methodology Valuation™ Question Index

OOF Problem Space Intelligence Index™ (PSII™)

Understanding the Value of Methodologies Before Licensing, Acquiring, Commercializing, or Scaling Them

Organizations routinely value:

- companies,
- intellectual property,
- patents,
- brands,
- products,
- technologies.

Far fewer assess the value of methodologies themselves.

Methodology Valuation™ exists to help organizations understand the strategic, operational, intellectual, governance, and economic value of methodological assets.

This Question Index™ provides a structured collection of questions designed to support methodology valuation, opportunity assessment, licensing decisions, commercialization analysis, and strategic evaluation.

The objective is not to immediately determine value.

The objective is to understand the factors that create value.

Methodology Value Creation

What value does the methodology create? What problem does the methodology solve? How significant is the problem being solved? Does the methodology create measurable outcomes? Can value creation be demonstrated? Is value creation repeatable? Does the methodology improve performance? Does the methodology reduce risk? Does the methodology increase efficiency? Does the methodology create competitive advantage?

Methodology Differentiation

What makes the methodology different? Is the methodology unique? Can the methodology be easily replicated? Does the methodology offer a novel approach? Does the methodology solve problems differently? Are differentiators clearly defined? Can differentiation be demonstrated? Is differentiation sustainable? Does the methodology create barriers to imitation? Does differentiation increase value?

Methodology Market Demand

Is there market demand for the methodology? Which industries may benefit most? How large is the potential market? Is demand growing or declining? Are organizations actively seeking similar solutions? Does the methodology address emerging needs? Can demand be demonstrated? Are potential users identifiable? Is adoption likely? Does the methodology solve a recognized problem?

Methodology Commercialization

Can the methodology be licensed? Can the methodology be sold as a service? Can it support consulting services? Can it support training programs? Can it support certification programs? Can it support software products? Can it support governance frameworks? Can it support recurring revenue? Are commercialization pathways defined? Is commercialization practical?

Methodology Scalability

Can the methodology scale globally? Can it be adapted across industries? Can it support large organizations? Can it support small organizations? Can it operate across jurisdictions? Can it support multiple use cases? Does scalability increase value? Are scalability constraints known? Can growth be sustained? Is expansion realistic?

Methodology Adoption Potential

How easily can organizations adopt the methodology? Does adoption require specialized expertise? Are implementation requirements reasonable? Can adoption be accelerated? Are barriers to adoption known? Can benefits be communicated clearly? Is training required? Can adoption be measured? Is adoption likely to create network effects? Does adoption improve long-term value?

Methodology Strategic Value

Does the methodology create strategic advantages? Does it support long-term organizational goals? Can it improve governance? Can it improve decision-making? Can it improve operational resilience? Can it support innovation? Does it create intellectual leverage? Can it influence industry practices? Does it strengthen organizational capability? Does it create sustainable advantages?

Methodology Intellectual Value

Does the methodology represent original know-how? Can intellectual contribution be demonstrated? Does the methodology contain unique knowledge? Can the methodology be protected? Does intellectual depth increase value? Is knowledge transferable? Does the methodology preserve expertise? Can future development increase value? Is intellectual ownership clear? Does intellectual uniqueness

contribute to valuation?

Methodology Risk Factors

What risks may reduce methodology value? Does value depend on specific individuals? Can competitors replicate the methodology? Are governance risks present? Are adoption risks present? Are scalability risks present? Are commercialization assumptions realistic? Could value decline over time? Are dependencies clearly identified? Is value resilient to market changes?

Methodology Future Potential

Can the methodology evolve? Can new modules be added? Can new standards be derived?

Can future services be built around it? Can future architectures emerge from it? Does it create new opportunities? Can it support future technologies? Can it support AI environments? Can it remain relevant over time? What future value creation pathways exist?

Related OOF® Service

Methodology Valuation™

Methodology Valuation™ helps organizations assess the strategic, operational, intellectual, governance, commercialization, and long-term value of methodologies before licensing, acquiring, investing in, commercializing, or scaling methodological assets.

About the OOF Problem Space Intelligence Index™

The OOF Problem Space Intelligence Index™ (PSII™) is a growing collection of structured questions designed to help identify, understand, classify, and investigate problems before searching for solutions.

Questions are organized into categories, clusters, and problem environments to improve clarity, analysis, governance, and decision-making.

The objective is not merely to provide answers.

The objective is to ensure that the right questions are being asked.

OOF® MIP® Protection Notice
