

# Responsibility Mapping Analysis™ Question Index

## OOF Problem Space Intelligence Index™ (PSII™)

### Mapping Responsibility, Accountability, Authority, Delegation, and Ownership Relationships

Organizations frequently experience failures not because work was not performed, but because responsibility was unclear.

People assume others are responsible.

Authority exists without accountability.

Accountability exists without authority.

Responsibilities are delegated without oversight.

Ownership remains undefined.

Responsibility Mapping Analysis™ exists to identify, analyze, document, and understand responsibility relationships across organizations, governance systems, supply chains, projects, AI systems, autonomous agents, contractors, and operational environments.

This Question Index™ provides a structured collection of questions designed to support responsibility analysis, accountability mapping, authority assessment, delegation review, and ownership clarification.

The objective is not merely to assign responsibility.

The objective is to understand how responsibility operates.

---

## Responsibility Identification

Who is responsible? What responsibilities exist? Are responsibilities clearly defined? Are responsibilities documented? Are responsibilities understood consistently? Can responsibilities be demonstrated? Are responsibilities accepted? Are responsibilities measurable?

Are responsibilities operational? Can responsibilities be audited?

---

## Accountability Analysis

Who is accountable? Is accountability clearly assigned? Can accountability be demonstrated? Is accountability documented? Are accountability relationships understood? Are accountability gaps present? Are accountability conflicts present? Does accountability follow responsibility? Can accountability be enforced? Is accountability effective?

## Authority Analysis

Who has authority? What authority exists? Is authority documented?  
Are authority boundaries clear? Is authority traceable? Can  
authority be delegated? Are authority conflicts present? Can  
authority be audited? Does authority support accountability? Is  
authority operating effectively?

---

## Delegation Analysis

Can responsibilities be delegated? Can authority be delegated? Can  
accountability be delegated? Are delegation rules documented? Is  
delegation traceable? Are delegated responsibilities understood? Are  
delegation boundaries clear? Can delegated actions be audited? Are  
delegation failures visible? Is delegation functioning effectively?

---

## Ownership Analysis

Who owns the process? Who owns the outcome? Who owns the risk? Who  
owns the decision? Is ownership documented? Is ownership accepted?  
Are ownership conflicts present? Can ownership be demonstrated? Is  
ownership traceable? Does ownership support accountability?

---

## Responsibility Continuity

Does responsibility remain continuous? Can responsibility gaps  
occur? Does responsibility transfer during delegation? Is  
responsibility maintained during organizational changes? Is  
responsibility maintained across projects? Is responsibility  
maintained across supply chains? Can continuity failures be  
identified? Is responsibility traceable over time? Does continuity  
support governance? Is responsibility continuity protected?

---

## Multi-Layer Responsibility

Are multiple organizations involved? Are subcontractors involved?  
Are external partners involved? Are responsibility chains visible?  
Are responsibility transfers documented? Can responsibility be  
traced across layers? Are responsibility gaps present between  
layers? Are accountability conditions preserved? Can multi-layer  
relationships be audited? Is responsibility clear throughout  
the chain?

---

## Responsibility Risk

What responsibility risks exist? Are responsibility gaps creating  
risk? Are accountability failures creating risk? Are authority  
conflicts creating risk? Are ownership disputes creating risk? Can  
responsibility failures be anticipated? Are responsibility controls  
effective? Are risks documented? Can responsibility risks be  
mitigated? Is responsibility resilience sufficient?

---

# AI and Autonomous Systems Responsibility

Who is responsible for AI actions? Who is accountable for AI decisions? Can responsibility be assigned to an AI system? Who authorizes AI operations? Who oversees AI behavior? Can AI responsibility be audited? Are escalation pathways defined? Are human oversight requirements clear? Are autonomous decision boundaries established? Is responsibility preserved throughout AI operations?

---

## Responsibility Intelligence

Are responsibility relationships visible? Can responsibility complexity be managed? Does responsibility support governance objectives? Does responsibility support trust? Does responsibility support operational stability? Can responsibility improve decision-making? Are responsibility dependencies understood? Are responsibility conflicts resolved effectively? Does responsibility architecture support organizational goals? Is the responsibility environment fit for purpose?

---

## Related OOF® Service

### Responsibility Mapping Analysis™

Responsibility Mapping Analysis™ helps organizations identify, document, analyze, and improve responsibility, accountability, authority, delegation, ownership, and responsibility continuity relationships across operational, organizational, contractual, governmental, AI, and multi-layer environments.

## About the OOF Problem Space Intelligence Index™

The OOF Problem Space Intelligence Index™ (PSII™) is a growing collection of structured questions designed to help identify, understand, classify, and investigate problems before searching for solutions.

Questions are organized into categories, clusters, and problem environments to improve clarity, analysis, governance, and decision-making.

The objective is not merely to provide answers.

The objective is to ensure that the right questions are being asked.
