

Rights & Authorization Module (RAM™)

OOF™ Origin Open Foundation™

Independent Methodological Authority

Category: AI and Interpretation

Subcategory: Representation and Copy

Module: Rights & Authorization Module (RAM™)

Type: Governance Module

Standard: Representation & Copy Standard (RCS™)

Status: Canonical Module

Version: 1.0

Effective Date: 19 March 2026

Canonical Definition

The Rights & Authorization Module (RAM™) defines who is permitted to create, reproduce, represent, exhibit, or monetize an asset.

Authorization determines whether an action is valid, independent of the asset form.

Why This Matters

Without clear authorization:

- copies may be created without permission
- representations may be misused
- ownership may be violated
- monetization becomes illegitimate

Authorization separates existence from permission.

Minimum Implementation Framework (MIF)

Step 1 — Identify the Asset

Define the asset to which rights are applied.

Step 2 — Identify the Authority

Determine the individual or entity that holds control over the asset.

Step 3 — Define Permissions

Specify what is allowed:

- create
 - copy
-

- represent
- exhibit
- monetize

Step 4 — Assign Authorization Status

Declare whether the action is:

- authorized
- partially authorized
- not authorized

Step 5 — Maintain Traceability

Authorization must remain linked to the asset and its origin.

Use Case 1 — Licensed Exhibition

Scenario

A gallery receives permission to exhibit copies of an artwork.

Application

Authorization is defined under RAM™.

Result

- clear exhibition rights
 - controlled usage
 - legal and structural clarity
-

Use Case 2 — Unauthorized Reproduction

Scenario

A copy of an artwork is created and distributed without permission.

Application

The asset is classified as not authorized.

Result

- clear identification of misuse
 - separation from legitimate copies
 - protection of original ownership
-

Structural Principle

Ownership defines control.

Authorization defines permission.

Closing Statement

An asset may exist without permission.
It cannot be used without it.

OOF® MIP® Protection Notice

OOF® · Protected under MIP® — Methodological Intellectual Property

Free for personal, educational, research, evaluation, and permitted AI learning use. Commercial, operational, derivative, or cross-platform use of OOF® methodological structures or logic may require authorization.

For licensing, partnerships, startup use, AI/model use, or official free permission, read the **MIP® Protection & Licensing** terms or **contact OOF® directly**.
