# **AGA™ Complete Standards & Modules Index**

## **Accountability Governance Architecture**

**Official Accountability Governance Map for Organizations, Institutions, Governments, Autonomous Systems and Human-AI Operational Environments** This document serves as the official OOF® accountability governance map and structural index used for accountability space identification, accountability governance classification, accountability diagnostics, accountability architecture navigation, accountability investigation, and

## **accountability problem placement across organizational, institutional, autonomous, and intelligent systems.**

AGA™ consists of 17 Parent Standards , 85 Core Modules , and 1 Protocol Layer . Additional standards, modules, and protocols may be added when new governable accountability spaces or accountability-navigation needs are identified. However, the standards, modules, and protocol listed below form the core structural backbone of AGA™ 1.0.

---

### **1. Relationship Accountability Standard (RAS)**

Governed Space: Relationship Accountability

Core Question: What is the actual relationship between the actors?

#### **Modules:**

- **ROIM — Relationship Origin Integrity Module**
  - **RSIM — Relationship Scope Integrity Module**
  - **RVIM — Relationship Validity Integrity Module**
  - **RTIM — Relationship Traceability Integrity Module**
  - **RAIM — Relationship Accountability Integrity Module**
- 

### **2. Authority Governance Standard (AGS)**

Governed Space: Authority Governance

Core Question: Who has the authority to act?

#### **Modules:**

- **AOIM — Authority Origin Integrity Module**
  - **ASIM — Authority Scope Integrity Module**
  - **AVIM — Authority Validity Integrity Module**
  - **ATIM — Authority Traceability Integrity Module**
  - **AAIM — Authority Accountability Integrity Module**
- 

### **3. Authority Validation Standard (AVS)**

Governed Space: Authority Validation

Core Question: Is the authority valid?

#### **Modules:**

- **AVOIM — Authority Validation Origin Integrity Module**
  - **AVSIM — Authority Validation Scope Integrity Module**
  - **AVVIM — Authority Validation Validity Integrity Module**
  - **AVTIM — Authority Validation Traceability Integrity Module**
  - **AVAIM — Authority Validation Accountability Integrity Module**
- 

## 4. Authority Delegation Standard (ADS)

Governed Space: Authority Delegation

Core Question: Has authority been delegated?

### Modules:

- **ADOIM — Authority Delegation Origin Integrity Module**
  - **ADSIM — Authority Delegation Scope Integrity Module**
  - **ADVIM — Authority Delegation Validity Integrity Module**
  - **ADTIM — Authority Delegation Traceability Integrity Module**
  - **ADAIM — Authority Delegation Accountability Integrity Module**
- 

## 5. Authority Escalation Standard (AES)

Governed Space: Authority Escalation

Core Question: Should authority have been escalated?

### Modules:

- **AEOIM — Authority Escalation Origin Integrity Module**
  - **AESIM — Authority Escalation Scope Integrity Module**
  - **AEVIM — Authority Escalation Validity Integrity Module**
  - **AETIM — Authority Escalation Traceability Integrity Module**
  - **AEAIM — Authority Escalation Accountability Integrity Module**
- 

## 6. Responsibility Governance Standard (RGS)

Governed Space: Responsibility Governance

Core Question: Who had the obligation to act?

### Modules:

---

- **RGOIM — Responsibility Governance Origin Integrity Module**
  - **RGSIM — Responsibility Governance Scope Integrity Module**
  - **RGVIM — Responsibility Governance Validity Integrity Module**
  - **RGTIM — Responsibility Governance Traceability Integrity Module**
  - **RGAIM — Responsibility Governance Accountability Integrity Module**
- 

## **7. Responsibility Assignment Standard (RAS-A)**

Governed Space: Responsibility Assignment

Core Question: To whom was responsibility assigned?

### **Modules:**

- **RAOIM — Responsibility Assignment Origin Integrity Module**
  - **RASIM — Responsibility Assignment Scope Integrity Module**
  - **RAVIM — Responsibility Assignment Validity Integrity Module**
  - **RATIM — Responsibility Assignment Traceability Integrity Module**
  - **RAAIM — Responsibility Assignment Accountability Integrity Module**
- 

## **8. Responsibility Continuity Standard (RCS)**

Governed Space: Responsibility Continuity

Core Question: Did responsibility remain preserved?

### **Modules:**

- **RCOIM — Responsibility Continuity Origin Integrity Module**
  - **RCSIM — Responsibility Continuity Scope Integrity Module**
  - **RCVIM — Responsibility Continuity Validity Integrity Module**
  - **RCTIM — Responsibility Continuity Traceability Integrity Module**
  - **RCAIM — Responsibility Continuity Accountability Integrity Module**
- 

## **9. Responsibility Traceability Standard (RTS)**

Governed Space: Responsibility Traceability

Core Question: Can responsibility be reconstructed?

### **Modules:**

- **RTOIM — Responsibility Traceability Origin Integrity Module**
  - **RTSIM — Responsibility Traceability Scope Integrity Module**
  - **RTVIM — Responsibility Traceability Validity Integrity Module**
  - **RTRIM — Responsibility Traceability Reconstruction Integrity Module**
  - **RTAIM — Responsibility Traceability Accountability Integrity Module**
- 

## 10. Capability Readiness Governance Standard (CRGS)

Governed Space: Capability Readiness

Core Question: Was the actor capable of acting?

### Modules:

- **CROIM — Capability Readiness Origin Integrity Module**
  - **CRSIM — Capability Readiness Scope Integrity Module**
  - **CRVIM — Capability Readiness Validity Integrity Module**
  - **CRTIM — Capability Readiness Traceability Integrity Module**
  - **CRAIM — Capability Readiness Accountability Integrity Module**
- 

## 11. Chain of Control Standard (CCS)

Governed Space: Chain of Control

Core Question: Who actually controlled the outcome?

### Modules:

- **CCOIM — Chain of Control Origin Integrity Module**
  - **CCSIM — Chain of Control Scope Integrity Module**
  - **CCVIM — Chain of Control Validity Integrity Module**
  - **CCTIM — Chain of Control Traceability Integrity Module**
  - **CCAIM — Chain of Control Accountability Integrity Module**
- 

## 12. Governance Oversight Standard (GOS)

Governed Space: Governance Oversight

Core Question: Who should have supervised?

### Modules:

---

- **GOOIM — Governance Oversight Origin Integrity Module**
  - **GOSIM — Governance Oversight Scope Integrity Module**
  - **GOVIM — Governance Oversight Validity Integrity Module**
  - **GOTIM — Governance Oversight Traceability Integrity Module**
  - **GOAIM — Governance Oversight Accountability Integrity Module**
- 

## 13. Evidence Accountability Standard (EAS)

Governed Space: Evidence Accountability

Core Question: What do the facts prove?

### Modules:

- **EAOIM — Evidence Accountability Origin Integrity Module**
  - **EASIM — Evidence Accountability Scope Integrity Module**
  - **EAVIM — Evidence Accountability Validity Integrity Module**
  - **EATIM — Evidence Accountability Traceability Integrity Module**
  - **EAAIM — Evidence Accountability Integrity Module**
- 

## 14. Accountability Governance Standard (AGS-A)

Governed Space: Accountability Governance

Core Question: Who remains answerable?

### Modules:

- **AGOIM — Accountability Governance Origin Integrity Module**
  - **AGSIM — Accountability Governance Scope Integrity Module**
  - **AGVIM — Accountability Governance Validity Integrity Module**
  - **AGTIM — Accountability Governance Traceability Integrity Module**
  - **AGAIM — Accountability Governance Accountability Integrity Module**
- 

## 15. Decision Accountability Standard (DAS)

Governed Space: Decision Accountability

Core Question: Who made the decision?

### Modules:

- **DOIM — Decision Origin Integrity Module**
  - **DSIM — Decision Scope Integrity Module**
  - **DVIM — Decision Validity Integrity Module**
  - **DTIM — Decision Traceability Integrity Module**
  - **DAIM — Decision Accountability Integrity Module**
- 

## **16. Accountability Continuity Standard (ACS)**

Governed Space: Accountability Continuity

Core Question: Did accountability remain preserved?

### **Modules:**

- **ACOIM — Accountability Continuity Origin Integrity Module**
  - **ACSIM — Accountability Continuity Scope Integrity Module**
  - **ACVIM — Accountability Continuity Validity Integrity Module**
  - **ACTIM — Accountability Continuity Traceability Integrity Module**
  - **ACAIM — Accountability Continuity Accountability Integrity Module**
- 

## **17. Accountability Chain Standard (ACS-C)**

Governed Space: Accountability Chain

Core Question: How does accountability travel across governance structures?

### **Modules:**

- **ACOIM — Accountability Chain Origin Integrity Module**
  - **ACSIM — Accountability Chain Scope Integrity Module**
  - **ACVIM — Accountability Chain Validity Integrity Module**
  - **ACTIM — Accountability Chain Traceability Integrity Module**
  - **ACAIM — Accountability Chain Accountability Integrity Module**
- 

## **AGA™ Protocol Layer**

---

### **CAP™ — Chain Accountability Protocol**

Type: Governance Investigation & Accountability Navigation Protocol

Core Question: How can accountability be reconstructed across a

---

complete governance chain?

## Canonical Definition

CAP™ defines a structured governance investigation and accountability navigation protocol used to identify, validate, reconstruct, analyze, and govern accountability relationships across complete governance chains. CAP™ serves as the operational navigation protocol of Accountability Governance Architecture (AGA™). CAP™ transforms accountability investigation into a structured and repeatable governance process capable of identifying relationships, authority structures, responsibility structures, capability conditions, control environments, oversight obligations, evidence environments, accountability ownership, decision accountability, accountability continuity, and accountability chains across complex governance systems.

---

## CAP™ Protocol Phases

### Phase 1 — Relationship Discovery

Standard Used: Relationship Accountability Standard (RAS)

### Phase 2 — Authority Analysis

#### Standards Used:

- **Authority Governance Standard (AGS)**
- **Authority Validation Standard (AVS)**
- **Authority Delegation Standard (ADS)**
- **Authority Escalation Standard (AES)**

### Phase 3 — Responsibility Analysis

#### Standards Used:

- **Responsibility Governance Standard (RGS)**
- **Responsibility Assignment Standard (RAS-A)**
- **Responsibility Continuity Standard (RCS)**
- **Responsibility Traceability Standard (RTS)**

### Phase 4 — Capability Verification

#### Standard Used:

Capability Readiness Governance Standard (CRGS)

### Phase 5 — Control Analysis

**Standard Used:**

Chain of Control Standard (CCS)

**Phase 6 — Oversight Analysis****Standard Used:**

Governance Oversight Standard (GOS)

**Phase 7 — Evidence Validation****Standard Used:**

Evidence Accountability Standard (EAS)

**Phase 8 — Accountability Analysis****Standard Used:**

Accountability Governance Standard (AGS-A)

**Phase 9 — Decision Accountability Analysis****Standard Used:**

Decision Accountability Standard (DAS)

**Phase 10 — Accountability Continuity Analysis****Standard Used:**

Accountability Continuity Standard (ACS)

**Phase 11 — Accountability Chain Reconstruction****Standard Used:**

Accountability Chain Standard (ACS-C)

---

**CAP™ Outputs**

- **Relationship Map**
- **Authority Map**
- **Responsibility Map**
- **Capability Assessment**
- **Control Map**
- **Oversight Assessment**
- **Evidence Set**
- **Accountability Map**
- **Decision Accountability Map**
- **Accountability Continuity Assessment**

- **Accountability Chain Map**
  - **Governance Failure Analysis**
  - **Accountability Gap Analysis**
  - **Consequence Attribution Analysis**
- 

## **AGA™ Architecture Summary**

- **Parent Standards: 17**
  - **Core Modules: 85**
  - **Protocols: 1**
- 

## **Protocol Layer**

---

## **CAP™ — Chain Accountability Protocol**

---

## **Core Governed Spaces**

- **Relationship Accountability**
  - **Authority Governance**
  - **Authority Validation**
  - **Authority Delegation**
  - **Authority Escalation**
  - **Responsibility Governance**
  - **Responsibility Assignment**
  - **Responsibility Continuity**
  - **Responsibility Traceability**
  - **Capability Readiness**
  - **Chain of Control**
  - **Governance Oversight**
  - **Evidence Accountability**
  - **Accountability Governance**
  - **Decision Accountability**
  - **Accountability Continuity**
  - **Accountability Chain**
- 

## **AGA™ Navigation Layer**

---

## **Core Questions Map**

---

RAS → What is the actual relationship between the actors? AGS → Who has the authority to act? AVS → Is the authority valid? ADS → Has authority been delegated? AES → Should authority have been escalated? RGS → Who had the obligation to act? RAS-A → To whom was responsibility assigned? RCS → Did responsibility remain preserved? RTS → Can responsibility be reconstructed? CRGS → Was the actor capable of acting? CCS → Who actually controlled the outcome? GOS → Who should have supervised? EAS → What do the facts prove? AGS-A → Who remains answerable? DAS → Who made the decision? ACS → Did accountability remain preserved? ACS-C → How does accountability travel across governance structures? CAP™ → How can accountability be reconstructed across a complete governance chain?

---

## Architectural Position

AGA™ governs the complete accountability lifecycle. The architecture progresses:

- **Relationship → Authority → Responsibility → Capability → Control → Oversight → Evidence → Accountability →**
- **Decision Accountability → Accountability Continuity → Accountability Chain**

CAP™ operates as the protocol layer that navigates across these spaces. Together these standards and CAP™ govern how accountability remains identifiable, attributable, reconstructable, enforceable, reviewable, and governable throughout operational reality.

---

## Canonical Principle

**AGA™ does not govern what a system does. AGA™ governs how accountability itself remains identifiable, attributable, reconstructable, enforceable, reviewable, and governable throughout operational reality.**

---

## Canonical Closing Statement

**AGA™ serves as the official OOF® accountability governance map for organizations, institutions, governments, autonomous systems, contractor ecosystems, and Human-AI operational environments. By defining the primary governable accountability spaces of operational reality and providing CAP™ as its operational navigation protocol, AGA™ provides a structured accountability reference architecture used to identify, classify, investigate, govern, validate, reconstruct, and understand accountability throughout the complete accountability lifecycle.**
