

Runtime Integrity Standard (RIS)

Self-Declaration

Category: AI and Interpretation

Subcategory: Execution & Runtime Integrity

Version: 1.0

Status: Canonical · Open

Effective Date: 13 April 2026

Purpose

This Self-Declaration confirms that a system operates in compliance with the **Runtime Integrity Standard (RIS)**.

It represents a formal statement of operational integrity and accountability.

Declaration Statement

The declaring entity confirms that system execution operates under the following conditions:

- actions are validated at the moment of execution
 - execution is continuously traceable and verifiable
 - tools are identifiable and controlled
 - environments are defined and observable
 - delegation is governed and accountable
 - approvals are enforced in real time
-

Integrity Commitment

The declaring entity acknowledges that:

- runtime integrity must exist at all times during execution
 - any loss of traceability, control, or authorization invalidates integrity
 - no action may be executed outside defined runtime conditions
-

Conditions of Validity

This declaration is valid only if:

- all Runtime Integrity Standard (RIS) conditions are continuously satisfied
 - no prohibited condition occurs
 - execution remains fully controlled and verifiable
-

Non-Certification Clause

This document:

- does not represent certification
- does not imply external validation
- does not grant regulatory approval

It is a self-declared statement of compliance.

Liability Statement

The declaring entity assumes full responsibility for:

- the accuracy of this declaration
 - the integrity of system execution
 - any consequences resulting from non-compliance
-

RIS Compliance Checklist

The declaring entity confirms that all conditions below are satisfied:

Execution Integrity

- ☐ All actions are validated at execution
- ☐ All actions are traceable

Tool Interaction Integrity

- ☐ All tools are identifiable
- ☐ All tool interactions are controlled

Environment Integrity

- ☐ All execution environments are defined
- ☐ Execution context is observable

Delegation Integrity

- ☐ All delegation is traceable
- ☐ Authority and responsibility are defined

Approval Integrity

- ☐ All critical actions require explicit approval
 - ☐ Approval is valid at execution
-

Declaration Confirmation

By signing below, the declaring entity confirms that all listed conditions are satisfied and actively enforced.

Entity Name: _____

Authorized Representative: _____

Position: _____

Date: _____

Signature: _____

Declaration Status

A system may declare:

"Runtime Integrity Compatible"

only while all conditions are continuously satisfied.

Canonical Closing Statement

Integrity declared without enforcement is invalid.
