

VOM™ — Video Origin Module

OOF™ Origin Open Foundation™

Independent Methodological Authority

Category: AI and Interpretation

Subcategory: Content Origin Declaration

Module: Video Origin Module (VOM™)

Type: Declaration Module

Standard: Origin Declaration Standard (ODS™)

Status: Canonical Module

Version: 1.0

Effective Date: 17 March 2026

Canonical Definition

The Video Origin Module (VOM™) defines how the origin of video content is declared using a single, visible origin code.

The module enables immediate recognition of whether video content is human generated, AI generated, or undeclared.

Declaration

Only one origin code may be used:

- **HGC** — Human Generated Content
 - **AGC** — AI Generated Content
 - **UGC** — Unknown Generated Content
-

Usage

Video Level (required — single code)

One origin code must be visibly present on the video.

Examples:

- HGC
- AGC
- UGC

Description Level (required)

The declaration must be included in the description:

Origin: HGC

OOF Compatible — ODS™ Standard

<https://originopenfoundation.org>

OOF Compatibility

Content using this module may include the statement:

OOF Compatible — ODS™ Standard

A reference link to the official source is required.

Use Case 1 — Platform Monetization Clarity

Scenario

A platform hosts both human and AI-generated video content.

Application

Creators declare origin using a single code (HGC / AGC / UGC).

Result

- Clear monetization eligibility
 - Reduced ambiguity
 - Improved platform trust
-

Use Case 2 — Creator Transparency

Scenario

A creator publishes video content to a global audience.

Application

The creator declares origin directly on the video and in the description.

Result

- Immediate viewer clarity
 - Increased trust
 - Clear ownership signal
-

Structural Principle

One code defines origin.

Declared origin defines value.

Closing Statement

Clarity does not require complexity.

It requires declaration.
