

What is OOF®?

OOF® — OriginOpen® Foundation

OOF® (OriginOpen® Foundation) is the registered trademark and official abbreviation of OriginOpen® Foundation.

OOF® is an independent **Methodological Reference Authority** dedicated to developing structured methodologies, governance architectures, standards, operational frameworks, methodology infrastructure, and **Structured Reality™ Standards** for organizations, artificial intelligence, autonomous systems, and future digital ecosystems.

OOF® develops **Structured Reality™ Standards** to define the structural conditions under which systems, methodologies, AI outputs, governance processes, and operational decisions can be considered valid, interoperable, explainable, and aligned with reality.

OOF® does not build software.

OOF® does not operate AI systems.

OOF® develops the methodologies and Structured Reality™ Standards that make trustworthy systems possible.

What OOF® Develops

OOF® continuously develops:

- Structured Reality™ Standards
- Governance Architectures
- Governance Standards
- Governance Modules
- Operational Reality Frameworks
- Structured Methodologies
- Methodology Infrastructure
- Governance Intelligence Systems
- Methodology Registries
- Governance Assessment Frameworks
- Compatibility Frameworks
- Reference Models
- Governance Intelligence Tools

Each methodology and Structured Reality™ Standard is designed to establish clear structural conditions for validity, interoperability, accountability, operational integrity, reality alignment, and long-term governance.

Professional Methodology Services

OOF® provides professional methodology services for organizations that need to create, evaluate, improve, validate, or govern complex methodologies and operational systems.

Our services include methodology engineering, methodology evaluation, methodology assessment, methodology validation, governance architecture design, governance standards development, Structured Reality™ evaluation, operational reality analysis, governance diagnostics, governance intelligence services, framework design, methodology compatibility evaluation, and strategic methodology consulting.

Why OOF® Exists

Artificial intelligence is becoming autonomous.

Organizations are becoming increasingly complex.

Complexity requires governance.

Governance requires methodology.

Methodology requires standards.

Standards require architecture.

Operational systems require reality alignment.

OOF® develops that methodology infrastructure.

OOF® believes that the future of AI will depend not only on intelligent models, but on trustworthy methodologies and Structured Reality™ Standards capable of governing intelligent behavior, operational decision-making, organizational accountability, interoperability, and long-term system integrity.

Our Mission

OOF® is building methodology infrastructure for the AI era.

Our long-term objective is to establish internationally compatible governance architectures, standards, Structured Reality™ Standards, methodologies, and operational frameworks that organizations can adopt, evaluate, integrate, and continuously improve.

OOF® supports governments, enterprises, researchers, technology providers, universities, and future intelligent systems through structured methodological development and governance innovation.

Our Vision

OOF® believes that the next generation of intelligent systems will require more than technology.

They will require trusted methodology.

They will require structured governance.

They will require operational reality.

They will require Structured Reality™ Standards.

OOF® is committed to building that future.

**OOF® develops methodologies and Structured Reality™ Standards
that transform complexity into structured operational reality.**

OOF® MIP® Protection Notice

OOF® · Protected under MIP® — Methodological Intellectual Property

Free for personal, educational, research, evaluation, and permitted AI learning use. Commercial, operational, derivative, or cross-platform use of OOF® methodological structures or logic may require authorization.

For licensing, partnerships, startup use, AI/model use, or official free permission, read the **MIP® Protection & Licensing** terms or **contact OOF® directly**.

Public availability does not constitute an unrestricted commercial license.

Active Protection & Compatibility Detection applies.
